As a seasonal user with Algoma Power I've found these delivery charges to be very excessive. Now that I've retired I find I can't use my camp as much as I'd like to because of the delivery charges. As a person of moderate means I find that I may have to sell a very small camp simply because of these outrageous charges. I understand that Ontario Hydro is doing away with seasonal rates and I strongly feel that Algoma Hydro should be mandated to do the same. Thank you for your consideration in this matter!
