**Re: EB-2021-0002 Enbridge Multi-Year Demand Side Management Plan  
Pollution Probe Letter of Comment**

Dear Ms. Long:

Pollution Probe is in receipt of the Environmental Defence letter to the OEB dated November 1, 2021 and related correspondence from BOMA and Enbridge. Pollution Probe supports the evidence extension request proposed by Environmental Defence. Pollution Probe believes this short extension aligns with a fair and open process and the OEB's interest to ensure that the 2023-2027 DSM Plan and related DSM Framework consider the most relevant and current information. The OEB allowed six months for Enbridge to prepare its initial evidence and an additional two week extension was granted to Enbridge for its recent updated evidence, which was purely administrative in nature. In Pollution Probe's view it would be unfair not to grant other parties the same courtesy. Pollution Probe supports the best DSM outcomes for Ontario energy consumers and communities from this proceeding and that requires a process that enables access to best available information.

Respectfully submitted on behalf of Pollution Probe.
