Hi Alexander,

The consumption and demand data in the 2021 CoS & 2022 IRM represent RRR data that has been pre-populated by the OEB in the RTSR Workform (CoS) and IRM Rate Generator (IRM).

For 2021 CoS – 2018 actual consumption and demand
For 2022 IRM – 2020 actual consumption and demand

We have no objections to this email chain being filed on the record.

Thanks,
Lori

Hi Lori,

For clarity, can you please identify the years for which consumption and demand data in the 2021 CoS and 2022 IRM columns correspond to.

Also, please be advised that I will be filing this email chain on the record. Let me know if you have any objections.

Thanks!

Hi Alexander,

Yes, this is a typo. For 2022 IRM, the consumption and demand is the pre-populated data from the Rate Generator Model however, it represents the RRR 2020 Consumption and Demand.

For consistency, maybe it is better to label it 2022 Consumption and Demand.

Thanks,
Lori

Hi Lori,

In Table 5 of your application (screenshot included below) under the 2022 IRM heading, it indicates that the consumption and demand values are from 2020. Is this a typo and should be read as '2022 Consumption and Demand'?

Please advise. Thanks!

Table 5 – RTSR Billing Determinants

Rate Class	Unit	2022 IRM (EB-2021-0051)		2021 CoS (EB-2020-0048)	
		2020 Consumption and Demand		2021 Consumption and Demand	
		Total Metered kWh	Total Metered kW	Total Metered kWh	Total Metered kW
RESIDENTIAL SERVICE	kWh	515,808,015	-	519,896,999	-
