**Re: EB-2021-0015 – Elexicon Energy Inc. (“Elexicon”) IRM and ICM
Application (the “Application”)
Elexicon’s Tariff of Rates and Charges**

Pursuant to the Ontario Energy Board’s December 16, 2021 Decision in the above noted matter, the following are Elexicon’s comments on some minor items within the Tariff of Rates and Charges:

- 1) On page 7 of the Tariff of Rates and Charges for the Whitby Rate Zone, there is a reference to Whitby Hydro within the definition of the Street Lighting Service Classification that should be changed to Elexicon Energy Inc.:
*“This classification relates to the supply of power for street lighting installations. Street lighting design and installations shall be in accordance with the requirements of ~~Whitby Hydro~~ **Elexicon Energy Inc.**, Town of Whitby specifications and ESA”*
- 2) On page 15 of the Tariff of Rates and Charges for the Veridian Rate Zone, the following charges appear under Non-Payment of Account, but not under Other:
 - Reconnection and meter – during regulator hour \$65
 - Reconnection at meter –after regular hours \$185These charges must be listed under both categories, as Elexicon’s reconnection charges are not solely limited to instances of non-payment. This treatment is consistent with the Decision and Order from Veridian Connections Inc.’s 2014 Cost of Service Rate Application (EB-2013-0174), and Elexicon and Veridian’s past Incentive Rate Mechanism applications.
- 3) In the Tariff of Rates and Charges for the Veridian Rate Zone, Elexicon suggests that the bolded wording below be added to all instances of the Rate Rider for

Disposition of Global Adjustment Account (2022) to make clear that this rate rider only applies to Class B customers:

- *Rate Rider for Disposition of Global Adjustment Account (2022) – effective until December 31, 2022*
*Applicable only for Non-RPP **Class B** Customers – Approved on an Interim Basis*

Sincerely,

Steve Zebrowski
Manager, Regulatory Policy
Elexicon Energy Inc.
