Dear Ms. Marconi,

**RE: Phase 2 of 2022 IRM Rate Application, EB-2021-0019
Revised Tariff of Rates and Charges**

As you know, on December 9, 2021, the Ontario Energy Board (“OEB”) issued a Decision and Order relating to ENWIN Utilities Ltd.’s (“ENWIN”) 2022 IRM Rate Application (the “Application”) approving changes to ENWIN’s distribution rates and other charges, which were set out in the Tariff of Rates and Charges attached at Appendix A, and convening a Phase 2 of the Application to consider ENWIN’s request to amend the description of the Large Use – 3TS Service Classification (“3TS Classification”).

On February 3, 2022, the OEB issued its Decision and Order on Phase 2 of ENWIN’s Application (the “Decision”). In the Decision, the OEB approved ENWIN’s request to amend the description of the 3TS Classification as requested, and it ordered that ENWIN file a revised Tariff of Rates and Charges containing the new OEB-approved 3TS Service Classification description by February 10, 2022. The OEB also suggested that ENWIN amend the name of the 3TS Classification in the revised Tariff of Rates and Charges.

Pursuant to the Decision, ENWIN is hereby filing a revised Tariff of Rates and Charges for the OEB’s consideration, which is attached to this letter and encompasses the following updates from the Tariff of Rates and Charges at Appendix A of the OEB’s Decision and Order dated December 9, 2021:

- The “Large Use – 3TS Service Classification” has been renamed the “Dedicated Transformer Station Service Classification”.
 - ENWIN believes that this revised name addresses the suggestions noted in the Decision and is reasonably descriptive of the service provided to customers in this service classification.

ENWIN Utilities Ltd.

4545 Rhodes Drive | PO Box 1625 Station A | Windsor ON N8W 5T1 | 519-251-7300

- ENWIN has updated the description of the Dedicated Transformer Station Service Classification to reflect the description approved in the Decision.
 - In the description, ENWIN has also proposed to correct a typographical error by replacing the word “premise” with “premises”.

Finally, ENWIN has made an administrative revision to its Tariff of Rates and Charges at the bottom of page 12 relating to the updated Wireline Pole Attachment charge of \$34.76 per attacher, per year, per pole to reflect the OEB’s Decision and Order in EB-2021-0302.

Please do not hesitate to contact me if you have any questions or concerns.

Sincerely,

ENWIN Utilities Ltd.

GROSS LOAD BILLING NOTE

The Billing Demand for Line and Transformation Connection Services is defined as the Non-Coincident Peak demand (MW) in any hour of the month. The customer demand in any hour is the sum of (a) the loss adjusted demand supplied from the distribution system plus (b) the demand that is supplied by embedded generation installed after October 30, 1998, which have installed capacity of 2MW or more for renewable generation and 1 MW or higher for non-renewable generation. The term renewable generation refers to a facility that generates electricity from the following sources: wind, solar, Biomass, Bio-oil, Bio-gas, landfill gas, or water. The demand supplied by embedded generation will not be adjusted for loss.
