Attention: Ms. Natasha Gocool

Application for Electricity Generation Licence by Kap Power Corp. regarding the Kapuskasing Power Plant: EB-2021-0298

Dear Ms. Gocool:

1. We are in receipt of your emails dated November 30, 2021 and December 6, 2021. URICA Energy Management Corporation provides responses to your information requests, on behalf of Kap Power Corp. ("Kap Power") below.

Question: Has the applicant received a power purchase agreement from the IESO? If so, can you please provide the date of the agreement and submit a copy of the agreement?

2. No, Kap Power does not have a power purchase agreement with the IESO. As indicated in the application, Kap Power intends to serve on-site load at the present time, and even though there is a connection to the transmission system, Kap Power does not intend to service load through the IESO using these transmission facilities.

Question: Can you please identify who Kap Power Corp. will be selling the electricity generated to.

3. Kap Power will be selling the electricity generated at the Kapuskasing power plant to its parent company, Validus Power Corp., for consumption on the Kapuskasing power plant site.

4. If the Board has any further questions regarding the application, or requires any further information in support of the Application, please contact the undersigned at darin.lowther@urica.ca or call at 403-554-0095.

Yours truly,
