Re: Case 2022-0293

URGENT

The name of our organization was used during the Technical Conference for this application today. We were named in association with another organization with whom we have no connection but in any event we were branded a “climate change denier organization.”

I believe that counsel for one of the sponsors later went on to use the word “crazy.”

We have been advised this morning that this constitutes slander.

We are an incorporated community group in the City of Ottawa, and are registered as such with the City. Our concern is with the possibility of grid-scale wind turbines being built in our rural communities, and is limited to that. We have a right to our concerns; we are interested in fact in exploring energy sources that fight climate change and help the environment, but that do not also cause harm.

With respect, **we demand that these comments be struck from the record of today’s proceedings.**

These comments have the potential to severely harm our reputation in the community and in our dealings with the City of Ottawa.

Please forward to the appropriate Case Manager.

Sincerely,

A handwritten signature in black ink that reads "Jane Wilson" followed by a stylized flourish.

Jane Wilson
