Toronto, ON M4P 1E4

Dear Ms. Marconi,

EB-2021-0307 - OEB Reliability and Power Quality Review – Hydro One Networks Inc. Working Group Nomination

On March 31, 2022, the Ontario Energy Board (“OEB”) issued a letter establishing the scope of their Reliability and Power Quality Review (RPQR), announced the formation of an RPQR Working Group (RPQR WG) and invited stakeholders to nominate individuals with relevant and experience for the RPQR WG. Hydro One Networks Inc. (Hydro One) is pleased to provide two nominations for the RPQR WG to represent Hydro One’s expertise in each the distribution and transmission system.

Hydro One has been proudly serving its customers reliable, safe, and cost-effective electricity for over 100 years. In Ontario we own more than 98% of transmission system capacity, operate the transmission system and own and operate one third of the provincial distribution system, predominately serving a low-density rural customer base. Transmitters are subject to different reliability requirements that are important to consider. Similarly, low-density rural distribution systems present unique reliability and power quality challenges. Hydro One is well-positioned to bring these important perspectives to the RPQR WG.

Hydro One wishes to nominate both Michael Medeiros, Manager, Distribution Investment Planning, and Ajay Garg, Manager, Major Project Development and Oversight from our transmission planning team for membership on the RPQR WG. Mr. Medeiros and Mr. Garg are both professional engineers with extensive experience at Hydro One and are very familiar with the technical and reporting requirements related to the reliability and power quality of our distribution and transmission systems.

Hydro One looks forward to participating in this important proceeding. Please do not hesitate to contact me directly or Mr. Medeiros at Michael.Medeiros@hydroone.com and Mr. Garg at Ajay.Garg@hydroone.com if you have any further questions regarding this matter.

Sincerely,

Frank D'Andrea
