Toronto, Ontario M4P 1E4

**Re: Reliability and Power Quality Review
OEB File No. EB-2021-0307**

Dear Ms. Marconi,

Entegrus Powerlines Inc. ("Entegrus") respectfully requests the opportunity to participate in the upcoming Reliability and Power Quality Review ("RPQR") Working Group. Entegrus nominates Matthew Meloche, Senior Manager of Systems Planning Operations & Engineering, as our representative.

Matthew joined Entegrus in 2007 and is a Professional Engineering (PENG). He has since held a series of progressive roles, all involving oversight of reliability metrics, culminating in his current position as Senior Manager of System Planning Operations & Engineering. In this role, Matthew is responsible for distribution system integrity, reliability metrics, renewable generation connections, system capacity planning, smart grid development and system automation. Matthew would be supported in this initiative by Entegrus Vice President of Engineering and Operations, Tomo Matesic.

Matthew holds a Masters of Applied Science in Electrical Engineering from the University of Windsor and obtained his Professional Engineering designation in 2012. His recent body of work includes leading an internal Smart Grid project to support greater penetration of Electric Vehicles, as well as overseeing the connection of a battery generation facility in Entegrus' service territory. Matthew is also a Lecturer at St. Clair College – Thames Campus for the Powerline program. We are confident that his experience would assist the OEB in this initiative.

Matthew's contact information is as follows:

Matthew Meloche, P.Eng.
