**Re: NPS 12 East Sixteen Mile Creek Pipeline Replacement Project- TSSA file SR# 3019534  
- OEB file number: EB-2022-0012**

The applicable regulation that applies to NPS 12 East Sixteen Mile Creek Pipeline Replacement Project is [Ontario Regulation 210/01: Oil and Gas Pipeline Systems](#). The applicable standard for this project is CSA Z662-19 which TSSA adopted under [Oil and Code Adoption Document](#). The mentioned Code Adoption Documents (CAD) specifies the standards that are adopted by TSSA and any changes or addition to the requirements of CSA Z662-19.

TSSA audits all pipeline operators that are licensed to transmit “oil” or “gas” in the province of Ontario. TSSA also reviews and audits all new pipeline projects that are submitted to OEB for Leave To Construct (LTC). The review of the new pipeline projects submitted to OEB consist of reviewing the technical aspect of the project and focused on compliance to the adopted standards and O.Reg.210/01. TSSA has authority to issue order to the operator for any non-compliances to the regulation and/or adopted standards.

This project so far has been reviewed on the technical aspects of the project including design, material specification, wall thickness calculation and stress on the pipe wall thickness on the maximum operating pressure. TSSA did not find any non-compliances to the regulation or the adopted standard.

TSSA will audit and inspect the SCPL to ensure compliance with applicable technical and safety standards for construction of this project.

Should you have any questions, please contact me at 416.734.3539 or by e-mail at [kmanouchehri@tssa.org](mailto:kmanouchehri@tssa.org). When contacting TSSA regarding this file, please refer to the Service Request number provided above.

Yours truly,

Kourosh Manouchehri, P.Eng.,  
Fuels Safety Engineer
