Re: Milton Hydro, EB-2022-0049

**Objection to Evidence Withdrawal Of IT Strategy And Roadmap By PwC
Request For Access To All Confidential Information To These Proceedings**

OEB Procedural Order No. 1, issued on June 6, 2022, stated that the deadline for submitting objections to Milton Hydro re: replacing the original PwC Report with a PwC Summary Report was June 13, 2022. However, this date wasn't adhered to since OEB's decision was sent out mid morning on June 13, 2022. It would appear that published dates are randomly altered. This is of concern.

As an intervenor, I object to Milton Hydro's request to withdraw the, already heavily redacted, IT Strategy & Roadmap PwC Report and have it replaced with a Summary Report. Mr. M. Rubenstein has detailed the support for this objection and I fully concur with his position.

Additionally, I am requesting access to All confidential redacted information for the following:

- a) 24/7 System Control Room & Operations Case
- b) Building Renovations Business Case
- c) Cresa's Strategic Facility Plan
- d) Bringing Disallowed Space Into Rate Base Business Case
- e) IT Strategy & Roadmap

This confidential information is required to do an adequate analysis of Milton's Hydro Application for a huge increase to the electricity rates it charges customers. Without this information, it is difficult to evaluate the plans and to assess what positive outcomes there are for customers. With regard to the location of the Control Room, the location will impact costs and knowing, if for example, the Control Room is contained in the main building of Milton Hydro or whether it will be at another location is information which is needed to assess costs in this regard.

I will use this information only in my capacity as an intervenor to this review for a rate increase.

I will not reproduce, divulge or in any other manner use the information, other than for evaluation purposes

I will expunge all the information immediately at the close of these proceedings.

J.O.L. Shewchun
