**EB-2022-0086 – Dawn to Corunna Replacement Project Leave to Construct
Pollution Probe Info for Technical Conference**

Dear Ms. Marconi:

In accordance with PO#2 for the above-noted proceeding, Pollution Probe is confirming attendance of Michael Brophy at the technical conference commencing July 27. Topic areas for questioning include project purpose, need, timing, alternatives, project net impacts/mitigation and project economics.

Pollution Probe understands that the storage system including Corunna related infrastructure is part of the integrated compression, storage and transmission system and to the extent that Enbridge could start with a short presentation to highlight the interaction with the broader system (with and without the project, including in-franchise and ex-franchise impacts), it would be appreciated and could decrease some time related to those issues.

Respectfully submitted on behalf of Pollution Probe.

Michael Brophy, P.Eng., M.Eng., MBA
