1. INTRODUCTION AND MANAGER'S SUMMARY

- 2 Grimsby Power Incorporated ("Grimsby Power") is a corporation incorporated pursuant to the
- 3 Business Corporations Act (Ontario) with its head office in the Town of Grimsby. Grimsby Power
- 4 owns and operates the electricity distribution infrastructure serving approximately 11,900
- 5 residential and commercial customers within the Town of Grimsby municipal boundaries.
- 6 Grimsby Power also owns and operates a 230kV to 27kV transformation station, known as
- 7 Niagara West MTS, which supplies Grimsby Power and Niagara Peninsula Energy Inc. a
- 8 neighbouring Local Distribution Company (LDC).
- 9 Grimsby Power filed a comprehensive Cost of Service application for 2022 rates July 30, 2021.
- 10 GPI had rates approved by the Ontario Energy Board under file number EB-2021-0027 effective
- 11 January 1, 2022.

- 12 The Applicant hereby applies to the Ontario Energy Board (the "OEB" or "the Board") pursuant to
- 13 Section 78 of the Ontario Energy Board Act, 1998 (the "OEB Act") for approval of its proposed
- 14 distribution rates under the parameters set out in the Ontario Energy Board's 4th Generation
- 15 Incentive Regulation Mechanism ("IRM") for rates effective January 1, 2023.
- 16 Specifically, Grimsby Power hereby applies for an order or orders granting distribution rates
- 17 updated and adjusted in accordance with Chapter 3 of the Filing Requirements for Electricity
- 18 Distribution Rate Applications dated May 24, 2022. This application for adjusted rates pertains to
- 19 all customers within Grimsby Power's service territory. No specific requests are being made by
- 20 GPI that will affect any particular customer.
- In the event that the Board is unable to provide a Decision and Order in this Application for
- implementation by the Applicant as of January 1, 2023, Grimsby Power requests that the Board
- 23 issue an Interim Rate Order declaring the current Distribution Rates and Specific Service Charges
- 24 as interim until the decided implementation date of the approved 2023 distribution rates.
- 25 If the effective date does not coincide with the Board's decided implementation date for 2023
- 26 distribution rates and charges, Grimsby Power requests permission to recover the incremental
- 27 revenue from the effective date to the implementation date.
- 28 In the preparation of this application, Grimsby Power used the following OEB models:

- 2023 IRM Rate Generator Model updated June 30, 2022
- 2023 GA Analysis Workform May 27, 2022
- 2023 Generic LRAMVA Workform 1.2
- 32 Grimsby Power confirms that the values used as billing determinants in the pre-populated model
- are correct. Grimsby Power made changes to the model as described later in this application.
- 34 The rates and other adjustments applied for and as calculated using the above models include
- 35 the following:

43

44

47

• A Price Cap Incentive Rate-Setting ("Price Cap IR") option to adjust its 2022 rates. The
Price Cap IR methodology provides for a mechanistic and formulaic adjustment to
distribution rates and charges in the period between Cost of Service applications.

Grimsby Power received approval to shift the rate design for residential customers towards
fully fixed rates in 2016 (EB-2015-0072). In 2019, Grimsby Power transitioned to fully fixed
distribution rates for the residential rate class. Therefore, no transition adjustments are
required. An adjustment to Retail Transmission Service Rates in accordance with Board

Guideline G-2008-0001 - Electricity Distribution Retail Transmission Service Rates

- Along with adjustments to its distribution rates, Grimsby Power also seeks approval of the following matters:
 - Continuance of Rate Riders for which the sunset date has not yet been reached
- Continuance of the Specific Services

revised on June 28, 2012.

- Continuance of Retail Service Charges adjusted by the inflation factor approved in this
 application
- Continuance of Loss Factors
- Continuance of the Smart Metering Entity charge
- Continuance of the MicroFit monthly charge

The impact of this application, as filed, is an increase to a typical residential RPP customer consuming 750 kWh of \$4.12 per month or 3.4%.

The following is a summary of the total bill impacts from this application, as filed.

		Demand kW		Sub-Total										al
RATE CLASSES / CATEGORIES	Consumption		Units		Α		В			C	;		Total	Bill
(eg: Residential TOU, Residential Retailer)	(kWh)	applicable)		\$	%	\$;	%	\$;	%		\$	%
RESIDENTIAL SERVICE CLASSIFICATION - RPP	321		kWh	\$ 1.9	9 6.9%	\$	2.73	8.5%	\$	3.03	8.4%	\$	2.91	4.3%

2. DISTRIBUTOR'S PROFILE

Grimsby Power Inc. ("GPI") is a corporation incorporated pursuant to the *Business Corporations*Act (Ontario) with its head office in the Town of Grimsby. Grimsby Power owns and operates the electricity distribution infrastructure serving approximately 11,900 residential and commercial customers within the Town of Grimsby municipal boundaries.

On October 1, 2015, Grimsby Power amalgamated with its affiliate Niagara West Transformation Corporation and now owns and operates a 230 kV to 27kV transmission station. The transmission station, known as Niagara West MTS, supplies Grimsby Power and Niagara Peninsula Energy Inc. a neighboring Local Distribution Company (LDC).

Grimsby Power receives electricity from the provincial electricity grid and transports it safely and reliably through its electricity distribution network of 69 square kilometers. This electricity network includes one municipal transformer station (Niagara West MTS), 355 kilometers of overhead lines, 337 kilometers of underground cable, 1,588 distribution transformers (overhead and underground pad mounts), and 3,685 poles.

3. PUBLICATION NOTICE

74 Grimsby Power will post a notice related to the application on its website at

www.grimsbypower.com and have a hard copy available upon request. Grimsby Power's office

remains closed to the public due to COVID-19.

75

76

77

4. PRICE CAP ADJUSTMENT (3.2.1)

In calculating 2023 rates, Grimsby Power has applied a Price Cap Adjustment of 3.30% to its base distribution rates as approved in our 2022 Cost of Service application (EB-2021-0027). The application of the 3.30% adjustment is based on the rate-setting parameters provided by the Board's 2022 IRM Rate Generator model. Table 1 shows the default values used in the determination of the Price Cap Adjustment. This adjustment is subject to change based on the OEB's issuance of the inflation factor for incentive rate setting for 2023 rates. At such time, the OEB will adjust the price escalator within Grimsby Power's application.

86 87

Table 1Price Cap Parameters

Price Cap Parameters										
Price Escalator		3.30%								
V Factor	Less: Productivity Factor	0.00%								
X-Factor	Less: Stretch Factor Group 1	0.00%								
Price Cap Index		3.30%								

88

89

90

92

95

The price cap index adjustment has not been applied to the following components of distribution rates:

- Rate adders or riders
 - Low voltage service charges
- 93 Retail Transmission Service Rates
- Wholesale Market Service Rate
 - Rural Rate Protection Charge
- Standard Supply Service Administrative Charge
- Capacity Based Recovery

Grimsby Power Inc EB-2022-0035 2023 IRM Application Page 5 of 31 Filed: August 3, 2022

98	MicroFit Service Charge
99	Specific Service Charges
100	Transformation and Primary Metering Allowances; and
101	Smart Metering Entity Charge
102	
103	5. REVENUE TO COST RATIO ADJUSTMENTS (3.2.2)
104	In GPI's 2022 Cost of Service application (EB-2021-0027), there were no prescribed adjustments
105	to the revenue to cost ratios required.
106	
107	6. RATE DESIGN FOR RESIDENTIAL ELECTRICITY (3.2.3)
108	On April 2, 2015, the OEB released its Board Policy: A New Distribution Rate Design for
109	Residential Electricity Customers (EB-2012-0210). The policy stated that electricity distributors
110	would transition the residential rate class to a fully fixed monthly distribution service charge. This
111	transition was implemented over a period of four years. The first year of the transition took place
112	in 2016 as per Grimsby Power's 2016 Cost of Service application (EB-2015-0072).
113	In the 2019 IRM application (EB-2018-0035) Grimsby Power sought approval for the fourth year
114	and final year of the transition to fully fixed residential distribution rates. With the approval of the
115	2019 application, Grimsby Power's residential customers had a fully fixed distribution rate and no
116	further transition adjustments are required.
117	The application, as filed, does not indicate that any rate class will have a bill impact above the
118	10% threshold for which rate mitigation would apply.

7. RTSR ADJUSTMENTS (3.2.4)

119

139

140

value and percentage change.

120	In reference to Board Guideline G-2008-0001 – Guideline Electricity Distribution Retail
121	Transmission Service Rates, issued October 22, 2008 and with revisions up to June 28, 2012
122	(Revision 4.0), Grimsby Power is applying for an adjustment of its Retail Transmission Service
123	Rates based on a comparison of historical transmission costs adjusted for new Uniform
124	Transmission Rate (UTR) levels and revenues generated from existing RTSRs. The expectation
125	of this approach is to minimize variances in the USoA Accounts 1584 and 1586.
126	Grimsby Power used the 2023 IRM Rate Generator Model (Tab 10-15) to determine the
127	proposed adjustments to the current Retail Transmission Service Rates approved in Grimsby
128	Power's 2022 Cost of Service application (EB-2021-0027). The worksheets reflect the Uniform
129	Transmission Rates (UTR's) approved by the Board effective January 1 and April 1, 2022 and
130	Hydro One's most recent approved rates effective January 1, 2022. Grimsby Power understands
131	Board staff will update each distributor's 2023 RTSR worksheet values in the rate generator
132	model to incorporate UTR adjustments approved for 2023.
133	The proposed adjustments of the Retail Transmission Service Rates and detailed calculations
134	are presented in tab 10 – 15 of the 2023 IRM Rate Generator Model.
135	The billing determinants utilized in this model are derived from the 2021 RRR 2.1.5 –
136	Performance Based Regulation, section 2.1.5.4 – Demand and Revenue. Grimsby Power
137	confirms that the billing determinants used in the model are accurate. The loss factor applied to
138	the metered kWh is the loss factor approved by the Board during the last rebasing in 2022. Table

2 below shows the current and proposed Retail Transmission Service Rates along with the dollar

Table 2
 Retail Transmission Service Rates – Current vs. Proposed

	RTSI	R - Network										
		Current	Proposed

Embedded Distributor Service Classification	\$/kW	0.6112	0.6626	0.0515	8.42%							

8. DEFERRAL AND VARIANCE ACCOUNTS (3.2.5)

Grimsby Power has completed the Board Staff's 2023 IRM Rate Generator—Tab 3 Continuity Schedule (Appendix B), and Tab 4 Billing Determinants for Deferral/Variance. The allocation of the deferral and variance balance is based on kWh, kW and customer count from Grimsby Power's 2021 RRR filing. Grimsby Power confirms that the quantities in the model are accurate and is requesting disposition of all Group 1 accounts, with the exception of 1595 (2020) and 1595 (2021), and account 1568 LRAMVA.

The threshold test shows a claim per kWh of \$0.0040 which is above the disposition threshold of \$0.001 per kWh (debit or credit); therefore, Grimsby Power is seeking to dispose its Group 1 deferral and variance account balances in this application. The total amount requested for disposition is \$1,076,313. This amount includes the 1568 LRAM Variance Account balance and the residual balances from account 1595 from 2019.

GPI is requesting, for the first time, the disposition of the residual balance in account 1595 (2019). The residual balance in 1595 is mainly due to the over collection of the 2019 DVA rate rider (non GA) in the amount of (\$17,100.77). The over collection is due to a higher amount of kWh's and kW's invoiced in 2019 compared to the forecast amounts in GPI's 2019 IRM Application (EB-2018-0035). Table 3 below shows the comparison between the forecast quantities and the invoiced quantities by rate class.

163164

Table 3Comparison Between Forecast & Invoiced Quantities

	2019												
			Fore	ecast				Invo	Invoiced

176

Actual interest has been calculated based on the Board's prescribed rates. The projected interest for the period of January 1, 2022 to December 31, 2022 is based on the Board's prescribed rate of .57% for January through March, 1.02% April through June, 2.2% July through September and an estimated rate of 2.2% for October through December. Table 5 below shows the projected interest on December 31, 2021 principal balances.

183

The deferral and variance continuity schedule and subsequent tabs allow for the allocation of variance amounts to Grimsby Power rate classes.

184

185

186

187

Grimsby Power has an Embedded Distributor rate class that does not contribute to all of the variance balances. The Embedded Distributor rate class only contributes to variances in 1584 RSVA-Retail Transmission Network Charge and 1586 RSVA-Retail Transmission Connection Charge. The Network and Connection charges are applied to the Embedded Distributor based

Grimsby Power Inc EB-2022-0035 2023 IRM Application Page 10 of 31

Filed: August 3, 2022

on the approved rates from Grimsby Power's tariff sheet. The difference between the Uniform Transmission Rates and the Network and Connection charged according to Grimsby Power tariffs creates balances for the Embedded Distributor in the 1584 and 1586 variance accounts. All other charges that pertain to the Embedded Distributor rate class are charged at final IESO rates and therefore the expense is equal to the revenue and no dollar value would be placed in any other variance account except 1584 and 1586. To allocate the variance balances appropriately amongst its rate classes Grimsby Power had to make certain changes to the 2023 Rate Generator Model. Grimsby Power changed tab 4 Billing Det. For Def-Var to include quantities for the Embedded Distributor in Metered kWh for Wholesale Market Participants (WMP) and Metered kW for Wholesale Market Participants (WMP) and removed the kWh value from Metered kWh for Non-RPP Customers (excluding WMP) and removed the kW from Metered kW for Non-RPP Customers (excluding WMP). Those changes to the model do not allow for any allocation of 1588, 1589 or 1580 to the Embedded Distributor, which accurately depicts how the Embedded Distributor has contributed to variance accounts. The Embedded Distributor does not contribute to the variance amounts in 1550 either therefore: another change to the model was required. In order to allocate the value of 1550 to all rate classes except the Embedded Distributor, Grimsby Power used the % of Total kWh adjusted for WMP to calculate the allocation instead of the % of Total kWh. The charging parameters noted above mirror that of a Wholesale Market Participant although the customer does not pay the IESO directly. The changes to the model accommodate the need to align the allocation of variance balances to rates classes that have contributed to the variance balance. In Table 6, Tab 4.Billing Det. For Def-Var is shown prior to any adjustments to the Embedded Distributor quantities, Table 7 shows Tab 4 after the changes. Table 8 and 9 show the allocation of the variance account balances before and after the changes to the model.

Grimsby Power Inc EB-2022-0035 2023 IRM Application Page 12 of 31

Filed: August 3, 2022

227 Grimsby Power believes the above model changes allow for the proper allocation of variance 228 balances to the rate classes that contributed to the account balances. 229 The Deferral and Variance account balances match the Audited Financial Statements and the 230 2.1.7 RRR Trial Balances with the exception of account 1568. Grimsby Power made entries in 231 cell BF46 to add the principal amount of LRAMVA requested for disposition and cell BK46 to add 232 the interest amount requested for disposition. Section 14 below provides further explanation. 233 9. ADJUSTMENTS TO DEFERRAL AND VARIANCE ACCOUNTS (3.2.5) 234 235 GPI made one principal adjustment to the deferral and variance accounts but no adjustments to 236 accounts previously approved by the OEB on a final basis. GPI made entries in cell BF46 to add 237 2021 LRAMVA principal requested for disposition and cell BK46 to add 2021 LRAMVA interest 238 requested for disposition, creating a difference of \$23,310 between RRR & 2021 balance. 239 Further explanation is provided in section 14 below. 240 241 10. WHOLESALE MARKET PARTICIPANTS (3.2.5.1) 242 In accordance with Chapter 3 filing requirements a distributor must not allocate any account 243 balances in Account 1588 RSVA – Power, Account 1580 RSVA – Wholesale Market Services 244 Charge and Account 1589 RSVA – Global Adjustment to a wholesale market participant (WMP). 245 A WMP refers to any entity that participates directly in any of the IESO-administered markets. 246 These WMPs must not be allocated the RSVA account balances related to charges which WMPs 247 settle directly with the IESO. 248 Wholesale Energy, Wholesale Market Services, and Global Adjustment for WMPs are charged to 249 the WMP by the IESO and therefore WMPs have not contributed to the 1580 RSVA Wholesale 250 Market Service Charge Account, 1588 RSVA Power Account, and 1589 RSVA Global Adjustment 251 account balances. 252 Grimsby Power's WMP customer belongs to the General Service 50 to 4,999 kW rate class.

Grimsby Power is proposing not to charge a Rate Rider for the Disposition of Global Adjustment

Account to the WMP customer.

Grimsby Power ensured that the rate riders are appropriately calculated for the following remaining charges that are still settled with the WMP. These charges include Account 1584 – RSVA – Retail Transmission Network Charge, Account 1586 RSVA – Retail Transmission Connection Charge and Account 1595 – Disposition/Refund of Regulatory balances.

Accounts 1580-RSVA-Wholesale Market Service Charge, 1588–RSVA-Power and 1589-RSVA-Global Adjustment are allocated to all classes based on kWh with WMPs kWh excluded. Grimsby Power used the WMPs 2021 consumption as reported in 2.1.5.4 filings.

11. GLOBAL ADJUSTMENT (3.2.5.2)

The Global Adjustment (GA) variance account 1589 captures the difference between the GA amounts billed to non-RPP Class B customers at the 2nd estimate and the actual Global Adjustment amount paid by Grimsby Power to the IESO for non-RPP Class B customers.

To dispose of the \$177,016 balance in account 1598 Grimsby Power is proposing a volumetric rate rider of \$0.0029 for all Non RPP Class B customers with the exception of the Unmetered Scattered Load rate class that has a proposed rate rider of \$0.0030. The Embedded Distributor rate category is not charged a GA rate rider. Table 10 below shows the GA rate rider for Non RPP Class B customers.

Table 10Tab 6.1 - GA Rate Rider for Non-RPP Class B

		Total Metered Non-RPP 2021 Consumption excluding WMP	Consumption for Class A Customers that were Class A for the entire period GA balance accumulated	Total Metered 2021 Consumption for Customers that Transitioned Between Class A and B during the period GA balance accumulated	Non-RPP Metered 2021 Consumption for Current Class B Customers (Non-RPP Consumption excluding WMP, Class A and Transition Customers' Consumption)	% of total kWh	Total GA \$ allocated to Current Class B Customers	GA Rate Rider

	Total	75 220 OE1	7 965 40	11 //5 150	000 000 33	100.0%	\$160 607		

In 2021, one Grimsby Power customer opted into the Industrial Conservation Initiative (ICI) program and transitioned to Class A effective July 1, 2021. GPI had two other Class A customers that were Class A throughout 2021. Grimsby Power's Class A customers paid the Global Adjustment based on their Peak Demand Factor as invoiced by the IESO creating no variance in 1589 for Class A.

279 In accordance with Chapter 3 Filing Requirements updated on May 24, 2022, global adjustment 280 rate riders are calculated on an energy basis (kWh). 281 **GA Analysis Workform** 282 Grimsby Power completed the 2023 GA Analysis Workform. Grimsby Power invoices its 283 customers based on the second estimate GA with the exception of the Embedded Distributor, 284 which is invoiced at the final posted rate. 285 The 2021 RRR Filing data showed 127,451,376 non-loss adjusted kWh for Non RPP Class B 286 customers. The Non-RPP Class B Including Loss Adjusted Consumption, Adjusted for Unbilled 287 (kWh) was 133,275,905. Using these two figures the loss factor calculated by the 2023 GA 288 Analysis Workform is 1.0457 which matches GPI's 2021 loss factor of 1.0457. 289 The total expected GA Variance calculated using the GA Analysis workform is \$71,627. This 290 variance was derived using the amount of loss adjusted consumption billed less the adjusted 291 unbilled consumption from the previous month plus the adjusted unbilled consumption from the 292 current month. This consumption total was then multiplied by the second estimate of GA plus GA 293 Recovery rate from the IESO. This gave the total dollar consumption at GA Rate Billed of 294 \$10,542,955. That same consumption value was then multiplied by the actual GA and GA 295 Recovery rate posted which totaled \$10,542,097. The calculated amount of GA and GA 296 Recovery paid to the IESO at the final posted rate was \$859 lower than the amount billed to 297 customers. 298 The (\$859) difference between GA and GA Recovery billed and invoiced was then combined with 299 the expected GA volume variance of \$72,486 for a total expected GA variance of \$71,627. 300 The actual net change in the principal amount from the G/L was \$174,200. The unresolved 301 difference between the G/L and the GA Analysis workform was \$102,573 or 1% prior to any 302 adjustments. Table 11 below shows the analysis of expected GA table from the GA Analysis 303 workform.

Within the reconciling items portion of the GA Analysis Workform Grimsby Power added an adjustment to account for the Embedded Distributor being invoiced at the final posted GA plus GA Recovery rate instead of the 2nd estimate. The analysis of the expected GA plus GA Recovery in the GA Analysis workform calculates GA and GA Recovery revenue from the Embedded Distributor at the 2nd estimate. A reconciling item is required to show the actual GA revenue from the Embedded Distributor at the final posted rate.

The calculated dollar value of GA plus GA Recovery revenue for the Embedded Distributor at the second estimate is \$5,186,984. The expense amount at the final posted rate was \$5,191,537. The revenue amount was understated by \$4,553. Table 12 below shows the calculation.

Table 12Calculation of Embedded Distributor GA at 2nd Estimate vs. Final Posted Rate

The net change in principal amount was adjusted by (\$4,553) bringing the adjusted net change in principal balance in the G/L to \$169,646. This brought the unresolved difference from \$102,573 or 1% to \$98,020 or 0.9%. The unresolved difference after adjustments is within the Board's +/- 1% of total annual IESO GA charges and is immaterial.

Table 13 below shows the reconciling items from the GA Analysis workform and total unresolved difference.

12. COMMODITY ACCOUNTS 1588 and 1589 (3.2.5.3)

On February 21, 2019, the Board issued accounting guidance related to commodity pass through accounts 1588 and 1589. Grimsby Power confirms that it has implemented the guidance issued by the Board for the settlement of RPP commodity.

The balances in 1588 & 1589 were last disposed, on a final basis, for 2020 balances through GPI's 2022 Cost of Service application.

Grimsby Power confirms that the Global Adjustment charge is prorated into the RPP and non-RPP portions. Grimsby Power requests the disposition of 1588 and 1589 on a final basis.

13. CAPACITY BASED DEMAND RESPONSE (CBDR) (3.2.5.4)

Grimsby Power follows the OEB's Accounting Guidance on CBDR issued July 25, 2016.

Grimsby Power Inc EB-2022-0035 2023 IRM Application Page 17 of 31

Filed: August 3, 2022

Grimsby Power records WMS revenues for CBDR on all consumption effective January 1, 2016 and onwards for Class B customers, excluding Wholesale Market Participants, in Account 4062 Billed - WMS Sub-account CBDR class B. Costs recorded from charge type 1351 for CBDR class B consumption is recorded in Account 4708 Charges – WMS, Sub-account CBDR Class B. Grimsby Power tracks the variance between the revenue billed to customers for Class B CBDR and the costs recorded under Charge Type 1351 for CBDR in Account 1580 WMS Sub-account CBDR Class B. Monthly opening balances are subject to carrying charges at the Board's prescribed rate.

The balance of 1580 Sub-account CBR Class B was not added to Account 1580 WMS control account because when separated the volumetric rate rider for CBR Class B was above \$0.0000 for all rate classes. The volumetric rate rider for CBR Class B is between (\$0.0001) and (\$0.0430). As per the Chapter 3 filing guide section 3.2.5.4 Capacity Based Recovery only when the volumetric rate rider for the allocated Class B rounds to zero at the fourth decimal place in one or more rate classes will the Sub-account Class B will be added to the 1580 WMS control account. As a result, the total balance of Account 1580 Sub-account CBR Class B reported on the continuity schedule is \$25,381 more than the reported balance in 2.1.7 Trial Balance.

14. LRAM VARIANCE ACCOUNT (LRAMVA) (3.2.6)

Grimsby Power is requesting the disposition of account 1568 in this IRM application. As per the 2021 CDM Guidelines distributors may request disposition of all outstanding LRAMVA balances related to previously established LRAMVA thresholds. Grimsby Power is seeking disposition in this IRM application for LRAMVA related to 2021, \$22,310, plus remaining interest from previous years of \$720 for a total of \$23,030. The 2021 amount requested for disposition was entered in Tab 3 as a principle adjustment in cell BF46 of \$22,164 and an interest adjustment of \$146 in cell BK46. Table 14 below shows the LRAMVA amounts for 2021 per table 1-b of the 2023 Generic LRAMVA Workform 1.2.

366367

Table 14LRAMVA Amounts Per Table 1-b for 2021

373374

376

377

378

GPI is will not seek any further disposition of LRAMVA for any year beyond 2021.

375 The 2023 Generic LRAMVA Workform 1.2 was used to calculate the LRAMVA amounts for 2021.

GPI used the 2011-2014 Persistence Report, 2017 Final Verified Annual Program Results and

the Participation and Cost reports from January 2018 – April 15, 2019 made available by the

IESO to calculate the LRAMVA on persistence values.

The 2023 Generic LRAMVA Workform 1.2 excel workbook has been submitted along with the 2011-2014 Persistence Report, Final Verified Annual Report (2017 and earlier programs) and the

participation and cost reports January 2018 – April 15, 2019 (submitted in EB-2021-0027).

15. TAX CHANGE (3.2.7)

The OEB's 2008 report entitled Supplemental Report of the Board on 3rd Generation Incentive Regulation for Ontario's Electricity Distributors prescribes a 50/50 sharing of impacts of legislated tax changes from distributors tax rates embedded in its OEB approved base rate known at the time of the application.

Grimsby Power has completed the Board's 2023 IRM Rate Generator Model (Tab 8. STS-Tax Change and Tab 9. Shared Tax-Rate Rider). In GPI's 2022 Cost of Service application grossed up taxes of \$303,465 were included in rates. The grossed up tax amount calculated for 2023 is \$274,517, a reduction of \$28,948. The total amount of shared tax savings is \$14,474. Table 16 below shows the calculation of the tax difference and shared amount.

Table 16Summary – Sharing of Tax Change Forecast Amounts

	2022		2023
OEB-Approved Rate Base	\$ 28,607,691	\$	28,607,691
OEB-Approved Regulatory Taxable Income	\$ 841,687	\$	841,687
Federal General Rate Federal Small Business Rate			15.0% 9.0%
Federal Small Business Rate (calculated effective rate) ^{1,2} Ontario General Rate Ontario Small Business Rate Ontario Small Business Rate (calculated effective rate) ^{1,2}			11.8% 11.5% 3.2% 11.5%
Federal Small Business Limit Ontario Small Business Limit		\$ \$	500,000 500,000

Federal Effective Tax Rate Provincial Effective Tax Rate	_		13.1% 11.5%
Combined Effective Tax Rate	26.5%		24.6%
Total Income Taxes Payable	\$ 223,047	\$	207,003
OEB-Approved Total Tax Credits (enter as positive number)		\$	-
Income Tax Provision	\$ 223,047	\$	207,003
Grossed-up Income Taxes	\$ 303,465	\$	274,517
Incremental Grossed-up Tax Amount		-\$	28,948
Sharing of Tax Amount (50%)		-\$	14,474

The reduction in calculated gross taxes for 2023 is due to a decrease in Federal tax. In the 2022 CoS the Federal General rate of 15% was used. In GPI's 2023 IRM the Federal rate used is 11.8% in tab 8. STS-Tax Change.

398 The calculated tax sharing amount is allocated to customer rate classes based on GPI's 2022

Board approved billing determinants and distribution rates (2022 COS file number EB-2021-

400 0027).

Table 17 below shows the calculation of the rate riders for the tax-sharing amount.

Grimsby Power Inc EB-2022-0035 2023 IRM Application Page 22 of 31

Filed: August 3, 2022

430	The largest percentage increase occurs for a retailer enrolled Unmetered Scattered Load
431	customer with consumption of 650 kWh. The total bill impact for this type of customer is \$10.51
432	or 9.8%. Approximately nine customers would be impacted at this level.
433	The largest increase in dollars will impact the Embedded Distributor rate class. The total bill
434	impact for this customer is \$5,211.14 or 0.7%. Grimsby Power only has one Embedded
435	Distributor.
436	A typical residential customer with monthly consumption of 750 kWh will see a monthly bill
437	increase of \$4.12 or 3.4%.
438	A residential customer at GPI's 10 th percentile will use approximately 321 kWh's per month. The
439	total bill impact for GPI's 10 th percentile customers is \$2.91 or 4.3%.
440	To determine the 10 th percentile GPI compiled a list of all residential customers with twelve
441	months of consumption in 2021 from its billing system. Grimsby Power calculated the average
442	monthly kWh consumption by dividing each residential customer's annual consumption by twelve.
443	One of the contributors to the total bill increase is the increase in distribution revenue of 3.3%
444	according to the mechanistic and formulaic adjustment to distribution rates and charges in the
445	period between Cost of Service applications. Another driver of the increase is the RTSR Network
446	and RTSR Connection charges.
447	An increase in charges form the IESO and Hydro One drives the increase in RTSR Network and
448	RTSR Connection. In 2022, Grimsby Power had to recover \$2,406,004 in Network costs and
449	\$858,862 in Connections costs to cover the amounts charged by the IESO and Hydro one. In
450	2023, Grimsby Power needs to recover \$2,674,723 in Network costs (up \$268,719 or 11%) and
451	\$981,312 in Connections costs (up \$122,450 or 14%). The recovery of these costs is allocated by
452	rate class and accounts for a year over year change of approximately 7% for Network charges
453	and 8% for Connection charges.
454	Grimsby Power submits that the proposed total bill impacts for all customers are below the 10%
455	threshold above which mitigation measures must be considered. Grimsby Power believes the
456	proposed bill impacts are just and reasonable.

20. CERTIFICATION

- 458 Grimsby Power has followed the instructions provided in the OEB's 2023 IRMRate Generator
- 459 Model as well as Chapters 1 & 3 of the OEB's Filing Requirements for Electricity Distribution Rate
- 460 Applications issued May 24, 2022.
- 461 Grimsby Power has assessed the organization's processes and procedures and to the best of my
- 462 knowledge, the following statements regarding accounts 1588 RSVA Power and 1589 RSVA GA
- 463 balances are true:

457

- Grimsby Power has appropriately established a process to settle RPP claims to accurately
- allocate amounts to 1588 and 1589.
- Sufficient controls have been designed and implemented to provide reasonable assurance
- of the accuracy, consistency and completeness of the accounts balances. This includes
- regular management review and annual third party auditor review of all regulatory account
- 469 balances.
- The staff responsible for the disposition of the two accounts are sufficiently trained for the
- 471 preparation and review of the account balances.
- 472 As a result, Grimsby Power applies for an Order or Orders approving the Tariff of Rates and
- 473 Charges set out in Appendix D to this Application as just and reasonable rates and charges
- 474 pursuant to section 78 of the OEB Act, to be effective January 1, 2023.

3.2.5.5 Disposition of Account 1595		
14	Confirmation that residual balances in Account 1595 Sub-accounts for each vintage year have only been disposed once	Pg 7 Line 157-16
14	Detailed explanations provided for any significant residual balances attributable to specific rate riders for each customer rate class, including for example, differences between forecast and actual volumes	Pg 7 Line 157-16
3.2.6 Lost Revenue Adjustment Mechanism Variance Account		
15	The 2021 CDM Guidelines require distributors filing an application for 2023 rates to seek disposition of all outstanding LRAMVA	Pg 17 Lines 358-3
	balances related to previously established LRAMVA thresholds Completed latest version of LRAMVA Workform in a working Excel file when making LRAMVA requests for remaining amounts	_
17	related to CFF activity	Submitted on RE
17	Final Verified Annual Reports if LRAMVA balances are being claimed from CDM programs delivered in 2017 or earlier. Participation and Cost reports in Excel format, made available by the IESO, provided to support LRAMVA balances for programs for the period of January 1, 2018 to April 15, 2019. These reports should be filed in Excel format, similar to the previous Final Verified Annual Reports from 2015 to 2017. To support savings claims for projects completed after April 15, 2019, distributors should provide similar supporting evidence	Submitted in Exce RESS
17	File other supporting evidence with an explanation and rationale should be provided to justify the eligibility of any other savings from a program delivered by a distributor through the Local Program Fund that was part of the Interim Framework after April 15, 2019.	Not Applicable
17	Meet the OEB's requirements related to personal information and commercially sensitive information as stated in the Filing Requirements	Confirmed
18	Statement identifying the year(s) of new lost revenues and prior year savings persistence claimed in the LRAMVA disposition	Pg 17 Lines 360-
18	Statement confirming LRAMVA based on verified savings results supported by the distributors final CDM Report and Persistence Savings Report (both filed in Excel format) and a statement indicating use of most recent input assumptions when calculating lost revenue	Pg 18 Lines 375-
18	Summary table with principal and carrying charges by rate class and resulting rate riders	Pg 18 Line 36
18	Statement confirming the period of rate recovery Statement providing the proposed disposition period; rationale provided for disposing the balance in the LRAMVA if significant	Pg 18 Line 369-
18	rate rider is not generated for one or more customer classes	Pg 18 Line 369-
18	File details related to the approved CDM forecast savings from the distributor's last rebasing application Rationale confirming how rate class allocations for actual CDM savings were determined by class and program (Tab 3-A of	Not Applicabl
18	LRAMVA Work Form)	Not Applicabl
18	Statement confirming whether additional documentation was provided in support of projects that were not included in distributor's final CDM Annual Report (Tab 8 of LRAMVA Work Form as applicable)	Not Applicabl
18	File in support of a previous LRAMVA application, distributors should provide Participation and Cost Reports and detailed project level savings files made available by the IESO and/or other supporting evidence to support the clearance of energy- and/or demand-related LRAMVA balances where final verified results from the IESO are not available. These reports should be filed in Excel format, similar to the previous Final Verified Annual Reports from 2015 to 2017	Submitted in Exc RESS
18 - 19	For a distributor's streetlighting project(s) which may have been completed in collaboration with local municipalities, the following must be provided: Explanation of the methodology to calculate streetlighting savings; Confirmation whether the streetlighting savings were calculated in accordance with OEB-approved load profiles for streetlighting projects; Confirmation whether the streetlighting project(s) received funding from the IESO and the appropriate net-to-gross assumption used to calculate streetlighting savings. For the recovery of lost revenues related to demand savings from street light upgrades, distributors should provide the following information: o Explanation of the forecast demand savings from street lights, including assumptions built into the load forecast from the last CoS application o Confirmation that the street light upgrades represent incremental savings attributable to participation in the IESO program, and that any savings not attributable to the IESO program have been removed (for example, other upgrades under normal asset management plans) o Confirmation that the associated energy savings from the applicable IESO program have been removed from the LRAMVA workform so as not to double count savings (for example, if requesting lost revenue recovery for the demand savings from a street light upgrade program, the associated energy savings from the Retrofit program have been subtracted from the Retrofit total) o Confirmation that the distributor has received reports from the participating municipality that validate the number and type of bulbs replaced or retrofitted through the IESO program o A table, in live excel format, that shows the monthly breakdown of billed demand over the period of the street light upgrade project, and the detailed calculations of the change in billed demand due to the street light upgrade project (including data on number of bulbs, type of bulb replaced or retrofitted, average demand per bulb)	Not Applicabl
19	Participation and Cost Reports of the IESO (for example Combined Heat and Power projects), distributors should provide the following information: o The third party evaluation report that describes the methodology to calculate the demand savings achieved for the program year. In particular, if the proposed methodology is different than the evaluation approaches used by the IESO, an explanation must be provided explaining why the proposed approach is more appropriate o Rationale for net-to-gross assumptions used o Breakdown of billed demand and detailed level calculations in live excel format	Not Applicabl
19 - 20	For program savings for projects completed after April 15, 2019, distributors should provide the following: o Related to CFF programs: an explanation must be provided as to how savings have been estimated based on the available data (i.e. IESO's Participation and Cost Reports) and/or rationale to justify the eligibility of the program savings. o Related to programs delivered by the distributor through the Local Program Fund under the Interim CDM Framework: an explanation and rationale should be provided to justify the eligibility of the additional program savings.	Not Applicabl
3.2.6.2 Continuing Use of the LRAMVA for New CDM Activities		
20	Statement whether it is requesting an LRAMVA for one or more of these activities, if this request has not been addressed in a previous application.	Pg 18 Line 37
3.2.7 Tax Changes	ριονίους αργικατιστί.	
21	Tabs 8 and 9 of Rate Generator model are completed, if applicable	Submitted in Exce RESS
21	If a rate rider to the fourth decimal place is not generated for one or more customer classes, the entire sharing tax amount is be transferred to Account 1595 for disposition at a future date	Not Applicable

Grimsby Power Incorporated EB-2022-0035

Filing Requirement Section/Page Reference	IRM Requirements	Evidence Reference, Notes				
3.2.8. Z-Factor Claims						
21	Eligible Z-factor cost amounts are recorded in Account 1572, Extraordinary Event Costs. Carrying charges are calculated using simple interest applied to the monthly opening balances in the account and recorded in a separate sub-accounts of this account	Not Applicable				
21	To be eligible for a Z-factor claim, a distributor must demonstrate that its achieved regulatory return on equity (ROE), during its most recently completed fiscal year, does not exceed 300 basis points above its deemed ROE embedded in its base rates	Not Applicable				
3.2.8.1 Z-Factor Filing						
Guidelines 22	Evidence that costs incurred meet criteria of causation, materiality and prudence	Not Applicable				
22	In addition, the distributor must: Notify OEB by letter of all Z-Factor events within 6 months of event Apply to OEB for any cost recovery of amounts in the OEB-approved deferral account claimed under Z-Factor treatment Demonstrate that distributor could not have been able to plan or budget for the event and harm caused is genuinely incremental Demonstrate that costs incurred within a 12-month period and are incremental to those already being recovered in rates as part of ongoing business exposure risk Provide the distributor's achieved regulatory ROE for the most recently completed fiscal year	Not Applicable				
3.2.8.2 Recovery of Z-Factor Costs						
22	Description of manner in which distributor intends to allocate incremental costs, including rationale for approach and merits of alternative allocation methods	Not Applicable				
22	Specification of whether rate rider(s) will apply on fixed or variable basis, or combination; length of disposition period and rational for proposal	Not Applicable				
22	Residential rate rider to be proposed on fixed basis	Not Applicable				
22 3.2.9 Off-Ramps	Detailed calculation of incremental revenue requirement and resulting rate rider(s)	Not Applicable				
22 - 23	If a distributor whose earnings are in excess of the dead band nevertheless applies for an increase to its base rates, it needs to	Not Applicable				
23	substantiate its reasons for doing so A distributor is expected to file its regulated ROE, as was filed for 2.1.5.6 of the RRR. However, if in the distributor's view this ROE has been affected by out-of-period or other items (for example, revenues or costs that pertain to a prior period but recognized in a subsequent one), it may also file a proposal to normalize its achieved regulated ROE for those impacts, for consideration by the OEB.	Not Applicable				
3.3.1 Advanced Capital Module						
4	Capital Module applicable to ACM and ICM, for an incremental or pre-approved Advanced Capital Module (ICM/ACM) cost recovery and associated rate rider(s)	Not Applicable				
24	Evidence of passing "Means Test" Information on relevant project's (or projects') updated cost projections, confirmation that the project(s) are on schedule to be	Not Applicable				
24 3.3.2 Incremental Capital	completed as planned and an updated ACM/ICM module in Excel format	Not Applicable				
Module		Nick Assets as Islands				
25	If proposed recovery differs significantly from pre-approved amount, a detailed explanation is required If updated cost projects are 30% greater than pre-approved amount, distributor must treat project as new ICM, re-filed business	Not Applicable				
25	case and other relevant material required	Not Applicable				
26 3.3.2.1 ICM Filing Requirements	Evidence of passing "Means Test"	Not Applicable				
·	The following should be provided when filing for incremental capital:	Not Applicable				
4	Capital Module applicable to ACM and ICM, for an incremental or pre-approved Advanced Capital Module (ICM/ACM) cost recovery and associated rate rider(s)	Not Applicable				
26	An analysis demonstrating that the materiality threshold test has been met and that the amounts will have a significant influence on the operation of the distributor	Not Applicable				
27	Justification that the amounts to be incurred will be prudent - amounts represents the most cost-effective option (but not necessarily the least initial cost) for ratepayers	Not Applicable				
27	Justification that amounts being sought are directly related to the cause, which must be clearly outside of the base upon which	Not Applicable				
	current rates were derived Evidence that the incremental revenue requested will not be recovered through other means (e.g., it is not, in full or in part,					
27	included in base rates or being funded by the expansion of service to include new customers and other load growth)	Not Applicable				
27 27	Details by project for the proposed capital spending plan for the expected in-service year Description of the proposed capital projects and expected in-service dates	Not Applicable Not Applicable				
27	Calculation of the revenue requirement (i.e. the cost of capital, depreciation, and PILs) associated with each proposed incremental capital project	Not Applicable				
27	Calculation of each incremental project's revenue requirements that will be offset by revenue generated through other means (e.g. customer contributions in aid of construction)	Not Applicable				
27	Description of the actions the distributor would take in the event that the OEB does not approve the application	Not Applicable				
27	Calculation of a rate rider to recover the incremental revenue from each applicable customer class. The distributor must identify and provide a rationale for its proposed rider design, whether variable, fixed or a combination of fixed and variable riders. As discussed at section 3.2.3, any new rate rider for the residential class must be applied on a fixed basis	Not Applicable				
3.3.2.3 ICM Filing	are seeded at a seed of the first that the first for the treatment of the applica of a fixed basis					
Requirements 28	Calulate the maximum allowable capital amount	Not Applicable				
3.3.2.6 ACM/ICM Accounting Treatment		пост пррповые				
30	Record eligible ICM amounts in Account 1508 - Other Regulatory Asset, Sub-Account Incremental Capital Expenditures, subject to assets being and useful	Not Applicable				
30	Record actual amounts in the appropriate sub-accounts of Account 1508 – Other Regulatory Assets in accordance with the OEB's APH Guidance	Not Applicable				
30	The applicable rate of interest for deferral and variance accounts for the respective quarterly period is prescribed by the OEB and published on the OEB's website	Not Applicable				

Grimsby Power Incorporated EB-2022-0035

Filing Requirement Section/Page Reference	IRM Requirements	Evidence Reference, Notes
30	At the time of the subsequent rebasing application, a distributor is required to provide the funding true-up calculation, if material, comparing the recalculated revenue requirement based on actual capital spending relating to the OEB-approved ACM/ICM project(s) to the rate rider revenues collected in the same period. Distributors should note assumptions used in the calculation (e.g. half-year rule). If the OEB determines that a true-up of variances is required, the variance will be refunded to (or collected from) customers through a rate rider	Not Applicable

APPENDIX C – GRIMSBY POWER 2022 TARIFF SHEETS (CURRENT)

SCHEDULE A DECISION AND RATE ORDER TARIFF OF RATES AND CHARGES GRIMSBY POWER INC. EB-2021-0027 JANUARY 13, 2022

Effective and Implementation Date January 1, 2022

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2021-0027

RESIDENTIAL SERVICE CLASSIFICATION

This class refers to the supply of electricity to residential customers residing in detached or semi-detached dwelling units, as defined in the local zoning by-law. Residential Service means a service which is less than 50 kW supplied to single-family dwelling units that is for domestic or household purposes, including seasonal occupancy. At Grimsby Power's discretion, residential rates may be applied to apartment buildings with 6 or less units by simple application of the residential rate or by blocking the residential rate by the number of units. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

EB-2021-0027

GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This class pertains to non-residential customers taking electricity at 750 volts or less whose monthly average peak demand is less than, or forecast to be less than, 50 kW. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

EB-2021-0027

GENERAL SERVICE 50 TO 4.999 KW SERVICE CLASSIFICATION

This classification applies to a non-residential account whose monthly average peak demand is equal to or greater than, or is forecast to be equal to or greater than 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available 16 in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

RESIDENTIAL SERVICE CLASSIFICATION

This class refers to the supply of electricity to residential customers residing in detached or semi-detached dwelling units, as defined in the local zoning by-law. Residential Service means a service which is less than 50 kW supplied to single-family dwelling units that is for domestic or household purposes, including seasonal occupancy. At Grimsby Power's discretion, residential rates may be applied to apartment buildings with 6 or less units by simple application of the residential rate or by blocking the residential rate by the number of units. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This class pertains to non-residential customers taking electricity at 750 volts or less whose monthly average peak demand is less than, or forecast to be less than, 50 kW. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification applies to a non-residential account whose monthly average peak demand is equal to or greater than, or is forecast to be equal to or greater than 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available 16 in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Processing fee, per request, applied to the requesting party	\$ 1.09
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail	
Settlement Code directly to retailers and customers, if not delivered electronically through the	
Electronic Business Transaction (EBT) system, applied to the requesting party	
Up to twice a year	\$ no charge
More than twice a year, per request (plus incremental delivery costs)	\$ 4.40
Notice of switch letter charge, per letter (unless the distributor has opted out of applying the charge as per the	
Ontario Energy Board's Decision and Order EB-2015-0304, issued on February 14, 2019)	\$ 2.20

LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle.

Total Loss Factor - Secondary Metered Customer < 5,000 kW	1.0398
Total Loss Factor - Primary Metered Customer < 5,000 kW	1.0294

Grimsby Power Inc EB-2020-0025 2021 IRM Application Page 28 of 31 Filed: August 17, 2020

APPENDIX E - BILL IMPACTS

Incentive Rate-setting Mechanism Rate Generator for 2023 Filers

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. To assess the combined effects of the shift to fixed rates and other bill impacts associated with changes in the cost of distribution service, applicants are to include a total bill impact for a residential customer at the distributor's 10th consumption percentile (In other words, 10% of a distributor's residential customers consume at or less than this level of consumption on a monthly basis). Refer to section 3.2.3 of the Chapter 3 Filling Requirements For Electricity Distribution Rate Applications.

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

Note:

- 1. For those classes that are not eligible for the RPP price, the weighted average price including Class B GA through end of June 2022 of \$0.0967/kWh (IESO's Monthly Market Report for April 2022) has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact table for the specific class.
- 2. Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1". Distributors should provide the number of connections or devices reflective of a typical customer in each class.
- Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.
