RE: EB-2022-0079: RESPONSE TO THE SOLICITATION FOR QUESTIONS FROM THE NON-RPP CLASS B DYNAMIC PRICING PILOT PROGRAM (the "PILOT") ENGAGEMENT SESSION

On behalf of Elexicon Energy, I am pleased to submit the following questions for the Ontario Energy Board's ("OEB") Staff consideration following the latest Pilot engagement session held on July 28, 2022:

1. In addition to the objectives identified on slides 14-16 of the July 28, 2022 engagement materials, are there any further Pilot objectives the OEB would like to consider?
2. What criteria will be considered in evaluating the proposed Pilot design?
 - a. To what degree will proponent proposal costs be a factor?
3. Please describe the level and type of guidance the OEB and IESO intends to provide regarding the design of the Pilot(s)?
4. Are OEB staff contemplating any modification(s) to the proposed delivery model or timeline?
5. Have any barriers/risks been identified to implementing the Pilot as presented at the July 28, 2022 engagement webinar?
6. Are there entities and/or partners that proponents should consider that the OEB may consider helpful to the success of the Pilot's objectives?
7. Please provide any information and/or estimates regarding anticipated Pilot costs, including on topics of resources required to implement an individual project under the Pilot, and any contemplated treatment of customer savings?

Elexicon is excited for the opportunity to participate in this important initiative. It is eager to work with the OEB to ensure the timely launch of the Pilot. If you require any further information or clarifications, please do not hesitate to contact the undersigned.

Sincerely,

Edyta McKay
