EXHIBIT 8: RATE DESIGN

- 2 This Exhibit documents the calculation of PUC Distribution Inc.'s ("PUC") proposed distribution
- 3 rates by rate class for the test year, based on the rate design as proposed in this Exhibit.

4

1

- 5 PUC has determined its total service revenue requirement to be \$27,752,199. The total revenue
- offsets in the amount of \$2,750,265 reduces PUC's total service revenue requirement to a base
- 7 revenue requirement of \$25,001,934 which is used to determine the proposed distribution rates.
- 8 The base revenue requirement is derived from PUC's capital and operating forecasts, weather
- 9 normalized usage, forecasted customer counts, and regulated return on rate base. The revenue
- 10 requirement is summarized in Table 8-1 below:

11

Table 8-1: Calculation of Base Revenue Requirement

Description	Amount
OM&A Expenses	\$13,949,291
Amortization Expenses	\$5,425,413

Service Revenue Requirement	\$27,752,199
Less Revenue Offsets	\$2,750,265
Base Revenue Requirement	\$25,001,934

- 14 The outstanding base revenue requirement is allocated to the various rate classes as outlined in
- 15 Exhibit 7 Cost Allocation, Table 7-2. The following Table 8-2 outlines the allocation of the base
- 16 revenue requirement to the rate classes.

PUC is proposing to maintain this fixed/variable split assumed in current rates to design the proposed monthly service charges. This proposal is consistent with PUC's 2018 COS application.

- 1 Table 8-4 shows the breakdown of the proposed fixed/variable split, the resulting monthly service
- 2 charge with the floor and ceiling as calculated in the cost allocation study. This proposal is consistent
- 3 with the Ontario Energy Board's ("Board") Decision in the following cases:
- 4 a) Centre Wellington Hydro Ltd. 2013 Cost of Service Rate (EB-2012-0113);
- 5 b) Atikokan Hydro Inc. 2012 Cost of Service Rate (EB-2011-0293);

- e) Hydro One Brampton Networks Inc. 2011 Cost of Service Application (EB-2010-0132);
- f) Kenora Hydro Electric Corporation Ltd. 2011 Cost of Service Application (*EB-2010-0135*);and
- g) In Horizon Utilities Corporation's ("Horizon") decision on their 2015 rates (EB-2014-0002) the Board approved Horizon's proposal to maintain the fixed/variable split. The following outlines the Board findings with regards to proposed fixed/variable split.
 - The Board accepts Horizon's proposal. While the Board's current policy direction is to move toward an increased fixed charge, this consideration was not the sole basis upon which the Board reached its Decision. The Settlement Agreement contains a re-opener provision which would address any policy change related to an increased fixed charge.
 - A fixed/variable split above the ceiling was approved in Horizon's last cost of service proceeding. In this application, Horizon has maintained the fixed/variable split.
- The Board notes that a principle of rate design is that in most circumstances rate stability is desirable. Counter-direction in rates can be confusing to ratepayers. Horizon has chosen to maintain a fixed/variable split that moves above the ceiling. Intervenors argue that this is contrary to the Board's report in EB-2007-0667.

- 4 Based on the above, it is PUC's proposal that it would be reasonable to maintain the current

8.1.2 Proposed Adjustment for Transformer Allowance

Currently, PUC provides a transformer allowance to those customers that own their transformation facilities. PUC proposes to maintain the current approved transformer ownership allowance of \$0.60 per kW ("Transformer Allowance"). The Transformer Allowance is intended to reflect the costs to a distributor of providing step down transformation facilities to the customer's utilization voltage level. Since the distributor provides electricity at utilization voltage, the cost of this transformation is captured in and recovered through the distribution rates. Therefore, when a customer provides its own step down transformation from primary to secondary, it should receive a credit of these costs already included in the distribution rates.

The amount of Transformer Allowance expected to be provided to the customers in the General Service 50 to 4,999 kW class that owns their transformers has been included in the volumetric charge for this class. This means the General Service 50 to 4,999 kW volumetric charge of \$8.9136 per kW will increase by \$0.1227 per kW to a total of \$9.0363 per kW to recover the amount of the Transformer Allowance over all kWs in the General Service 50 to 4,999 kW class.

The following Table 8-8 sets out PUC's proposed electricity distribution rates based on the foregoing calculations, including adjustments for the recovery of transformer allowance.

9

PUC receives wholesale transmission service from metered points that are directly connected to the grid. PUC is billed Uniform Transmission Rates by the IESO on all capacity delivered through these points. PUC passes these charges unto their customers with Board approved Retail Transmission Service Rates ("RTSR"). In order to determine the RTSR, PUC has completed the 2023_RTSR_Workform and it has been filed as part of this application. The RTSR information is also consistent with the Working Capital Allowance calculation. The RTSR Work Form is also provided in Appendix A in PDF format. Table 8-9 provides the RTSR rates generated from the PUC Distribution 2023_RTSR_Workform.

Unmetered Scattered Load	\$0.0078	

8.3 RETAIL SERVICE CHARGES

As outlined in Exhibit 9 Section 9.5.2.4, PUC is claiming the disposition for amounts forecasted to April 30, 2023. PUC is proposing to dispose of the balances in Account 1518 RCVA Retail and Account 1548 RCVA STR in this Application and to discontinue these accounts after April 1, 2023 on the assumption that PUC's 2023 rates are approved effective May 1, 2023.

8.4 REGULATORY CHARGES

On December 16, 2021, the Board issued a Decision with Reasons and Rate Order (EB-2021-0300) establishing that the Wholesale Market Service ("WMS") used by rate-regulated distributors to bill their customers shall be \$0.0030 per kilowatt-hour, effective January 1, 2022. For Class B customers a CBR component of \$0.0004 per kilowatt-hour shall be added to the WMS rate for a total of \$0.0034 per kilowatt-hour. For Class A customers, distributors shall bill the actual CBR costs to Class A customers in proportion to their contribution to peak. Furthermore, the same decision established that the Rural or Remote Electricity Rate Protection charge ("RRRP") used by rate

- 1 regulated distributors to bill their customers shall be .0005 per kilowatt-hour for electricity
- 2 consumed after January 1, 2022. This unit rate shall apply to a customer's metered energy
- 3 consumption adjusted by the distributor's Board-approved Total Loss Factor.

5

As part of PUC's 2018 COS Application (EB-2017-0071), the OEB approved an embedded generation rate rider refund of (\$.0004/kWh) for all rate classes. This rate rider was to address the systematic over collection of the WMS and RRRP from customers relative to the obligation to the Independent Electricity System Operator ("IESO"). The over collection is driven, in part, by embedded generation for which PUC is not required to pay the WMS or RRRP to the IESO. The rate rider is calculated by calculating the forecasted energy from embedded generation. PUC has updated its forecast of embedded generation for this application to 78,372,260 kWh which is the most recent 5 year

8.5 SPECIFIC SERVICE CHARGES

13

- 14 PUC is proposing the current specific service charges be maintained in this application. PUC has
- 15 followed the OEB Report on Wireline Pole Attachment Charges in its 2018 COS application and has
- 16 continued to follow additional guidance released by the OEB on December 16, 2021. PUC is
- 17 requesting disposition of a variance in account 1508 Pole Attachment Variance which is

- 1 explained further in Exhibit 9 Section 9.5.2.1. PUC has not forecasted an amount for disposition in
- 2 2022 as amounts are not final and PPUC will continue with this DVA account.

8.6 LOW VOLTAGE SERVICE RATES (WHERE APPLICABLE)

5 6

4

PUC does not charge any low voltage service rates.

14

15

16

8

The Independent Electricity System Operator, in its capacity as the Smart Metering Entity, filed an application for the 2023 - 2027 Smart Meter Charge with the OEB on March 31, 2022. The application and other documents which form the record of the proceeding are available on the OEB Website (EB-2022-0137). A Smart Metering Charge of \$0.43 per meter per month has been proposed, a reduction from the currently approved Smart Metering Charge of \$0.57 per meter per month. This charge is considered interim until a final decision is rendered. PUC has used the interim rate of \$0.43 per meter per month in its application.

17

18

8.8 LOSS ADJUSTMENT FACTORS

19 20

- PUC is not an embedded distributor. There have been no previous studies or recommendations by the OEB in previous decisions. PUC has calculated the total loss factor to be applied to customers'
- consumption based on the average wholesale and retail kWh for the years 2017 to 2021. The
- 23 calculations are summarized in the following Table 8-13 which also consistent with calculations
- 24 provided in Chapter 2 Appendix 2-R. The numbers reflected in this table match PUC's RRR filing
- 25 for 2017-2021.

8.9 TARIFF OF RATES AND CHARGES

8

- 9 The current and proposed tariff of rates and charges are provided in Appendix B and Appendix C.

14

- 15 The current definition of rate classes and the current terms and conditions of service has been
- 16 maintained in this application. PUC completed an update to its conditions of service on June 30,
- 17 2022, and gave customers until August 1, 2022, to comment. There were no comments received by
- customers and PUC filed the update with the OEB on August 8, 2022.

8.10 REVENUE RECONCILIATION

21

20

- 22 Table 8-15 provides reconciliation between the revenue based on the PUC proposed distribution
- 23 rates and the total base revenue requirement. The calculation of revenue under current rates is
- provided in Table 3-1 at section 2.3.1 of Exhibit 3.

8.11 BILL IMPACT INFORMATION

5

6

7

8

9

4

PUC submits that the bill impacts of its proposed electricity distribution rates are reasonable and do not require rate mitigation. The total bill impacts for a PUC Residential RPP customer at the 10th consumption percentile is 6.18%. This impact is below the standard acceptable impact of 10.00% and therefore does not require further mitigation. Table 8-16 summarizes the bill impacts.

- 1 Appendix D to this Exhibit presents the results of the assessment of customer total bill impacts by
- 2 level of consumption by rate class. Appendix D is consistent with Tab 6 Bill Impacts from the
- 3 following live Excel file "2023 Tariff Schedule and Bill Impact Model". Impacts are shown using
- 4 the applicable current approved rates and the proposed PUC Distribution rates for distribution,
- 5 including Rate Riders for the recovery of Deferral and Variance accounts discussed in Exhibit 9.
- 6 These bill impacts also include the reduction of approximately 2.70% in VVO consumption savings
- 7 from the SSGICM (EB-2018-0219 / EB-2020-0249). The rate impacts are assessed on the basis of
- 8 moving to the proposed distribution rates.

9

8.12 RATE MITIGATION

11

10

- 12 PUC submits that the bill impacts of its proposed electricity distribution rates are reasonable and
- do not require rate mitigation. PUC has consulted with the one customer of the Sentinel Light
- 14 Class and confirms that they are agreeable with this increase.

15

8.13 RATE HARMONIZATION MITIGATION ISSUES

17

16

- 18 PUC has not been a part of any MAADs transactions and therefore any rate harmonization issues
- 19 are not applicable to PUC.

RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a single family unit, non-commercial. This can be a separately metered living accommodation, town house, apartment, semi-detached, duplex, triplex or quadruplex with residential zoning. Class B consumers are defined on accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.
