9 Responses, 9-HONI-1, filed on September 28th, 2020, page 315 of 419

10
11 **Preamble:**

12 As per reference #1, Waterloo North Hydro Inc. (WNH) is proposing to allocate \$4,750 of
13 Account 1550 (LV Variance Account) balance, \$65,668 of Account 1584 (RSVA – Retail
14 Transmission Network Charge) balance and -\$13,267 of Account 1586 (RSVA – Retail
15 Transmission Connection Charge) balance to the Embedded Distributor rate class.

16
17 As per reference #2, the Embedded Distributor rate class is not subject to RTSR and LV
18 charges. As per reference #3, in its response to Hydro One's Interrogatory 9-HONI-1 in
19 EB-2020-0059, WNH acknowledged that since the Embedded Distributor rate class does
20 not contribute to accounts 1550, 1584 and 1586, it should not be allocated these account
21 balances.

22
23 **Interrogatory:**

- 24 a) Given the references noted above, please explain why WNH proposes to allocate
25 balances from accounts 1550, 1584 and 1586 to the Embedded Distributor rate class
26 in this application.
27 b) Please provide updated allocations of DVA balances which do not allocate RTSR and
28 LV account balances to the Embedded Distributor class and the resulting DVA rate
29 riders.
