**EB-2022-0157 – Panhandle Regional Expansion Project Leave to Construct  
Pollution Probe Participation in Technical Conference**

Dear Ms. Marconi:

In accordance with PO#1 for the above-noted proceeding, Pollution Probe is confirming attendance of Michael Brophy at the technical conference commencing October 6. Topic areas for questioning include project purpose, need, timing, alternatives, project net impacts/mitigation and project economics.

Pollution Probe understands that the Panhandle Regional system is part of the integrated transmission system and Enbridge has confirmed it will initiate the technical conference with a presentation to highlight the interaction with the broader system (with and without the project, including in-franchise and ex-franchise impacts). Pollution Probe estimates it will have a total of 90 minutes for questions with the assumption that several of our questions related to the system integration and IRP alternatives will be addressed in the presentation.

Respectfully submitted on behalf of Pollution Probe.

Michael Brophy, P.Eng., M.Eng., MBA
