**RE: EB-2022-0157 – EGI Panhandle Regional Expansion Project
FRPO Questions and Subject Areas**

As directed by the Board in Procedural Order No.1 issued August 12, 2022, FRPO intends to participate in the October 6th Technical Conference. The following are our subject areas and requests for information in advance of the Technical Conference that was omitted from the interrogatory responses.

- 1) In FRPO.1, we asked about the financial assurances associated with the “Letters of Commitment”. We would like to understand better how the assurance is calculated and triggered in the event the customer does not move to a contract.
- 2) In FRPO.4, FRPO.5, FRPO.11-13, we asked about the simulations and the throughput and pressures at key points in the system. We want to understand these answers better compared to firm demands that have been committed. We will also ask EGI to present the results of its most recent simulation verification on the current system.
- 3) In FRPO.6-8, we asked about the Detroit River crossings and Energy Transfer’s desire to move gas through Ojibway that came to light during the last Panhandle expansion. We will seek a better understanding of their answers.

We would ask that EGI file the results of its last system verification with the Board and distribute to the parties to aid in our discussions regarding simulating this system. This will aid in the effectiveness and efficiency of the dialogue in the Technical Conference.

All of Which is Respectfully Submitted on Behalf of FRPO,

Dwayne R. Quinn
Principal
DR QUINN & ASSOCIATES LTD.
