Hi Christiane,

NPEI has reviewed the updated Rate Generator Model, as follows:

- We confirm the accuracy of the updated Final Tariff Schedule (Tab 19).
- We confirm the accuracy of the updated Bill Impacts (Tab 20), with the exception of the bill impacts for the Embedded Distributor rate class which were not populated.

In the attached version of the Rate Generator Model, NPEI has populated the bill impacts for the Embedded Distributor rate class.

Thank you.

Regards,

Paul

Hi Paul,

The tabs 19 (Final Tariff Schedule) and 20 (Bill Impacts) have now been updated as per attached.

Kindly confirm accuracy.

Christiane

Hi Christiane,

NPEI has reviewed the updated Rate Generator Model, and we confirm that the items listed below were updated accurately.

However, NPEI notes that the updated rates are not yet populating on the Final Tariff Schedule. Therefore, the Final Tariff Schedule still needs to be updated.

Thank you.

Regards,

Paul

Ms. Wilson,

OEB staff has updated NPEI'S Rate Generator Model.

Tab 17:

2023 inflation factor issued on October 20 – 3.70%

Tab 19:

DRP - \$38.08

Wireline Pole Attachment Charge – the amount that is inflated is \$34.76 cell

D39

Retail Service Charges – updated using the 2023 inflation factor

Smart Meter Entity Charge - \$0.42 effective January 1, 2023

TOU RPP Prices effective November 1, 2022

Tab 20:

Ontario Electricity Rebate – 11.7%

Can you please check the accuracy of the updates?

Thanks,
Christiane
