When is all this going to stop? Large corporations in every major sector gouging families and individuals even more so that the pandemic is over. What factors are governing a change like this? Implementing this request by Enbridge would furthermore hurt and impact families who are already struggling. It is obscene that we will be forced to pay more money for basic necessities like heating or hot water. You are effectively going to make the choice for some families to potentially be without one or the other. And the ability to increase rates annually over the next 4 years. This just sounds like an inevitability granting a company who already has a net worth of 84.68 billion to increase rates for the next 4 years starting in 2024. You are stripping citizens of Ontario their basic needs by implementing this price increase. I am making it my personal choice and using my platform through social media to make this heard and visible as much as possible. I can only express disgust in another billion dollar company attempting to make the lives of Ontario citizens even more difficult than it already has been.
