As we all know, in recent years, extremely high inflation has put a huge financial burden on all Canadians and Ontarians. Making ends meet has become difficult for the majority of us. Enbridge, as a company, is already successful and should not be granted the right to increase prices for heat and hot water. These things are the basic necessities of life for every citizen and now is not the time to add an extra financial burden for us to keep warm. OEB, please consider that many can barely afford to pay their Gas bills now and an increase will result in this extra money being deducted from food budgets. Why should an already profitable company make even more profit when people are struggling in this unprecedented time. Please block this application from moving forward. Thank you.
