As a home owner I am concern about Enbridge's application for a rate increase. Enbridge estimate of an annual increase of \$28/residential home is not the total increase they anticipate for the home owner. In their email to home owners they state and I quote: "The impact of rate harmonization on customer bills excludes any other changes to rates resulting from the Incentive Rate-setting Mechanism and other applications that Enbridge Gas Inc. may file." These unknowns are not fair to the home owners and can, and more than likely will, result in a very significant increase in the billing to home owners.

This open ended application cannot and should not be accepted by the OEB as it would in essence be giving Enbridge a blank cheque whereby they fill in the amount they want. Home owners need a much better safe guard relationship with the provider; especially in winter where they are in essence held hostage given their survival is dependent on access to this energy source. The application by Enbridge must state exactly the increase they are requesting and not be contingent upon additional increases through other actions by Enbridge. Until we have a fully documented increase in billing for home owners, the home owner is not placed in a position to give a more comprehensive response. Thus, this application as provided by Enbridge must be rejected.
