LETTER OF COMMENT

Comments:

As a residential customer of Union South I am not supportive of this Application for the following reasons For the OEB and Enbridge to even entertain including a perpetual cost formula based on any rate of inflation is a destructive platform and policy. You will only invite more inflation and as a customer my key priority now and future is energy security and affordability. I see no reason to harmonize rates across the various zones of Ontario as Union Gas prior to Enbridge acquisition was always a lower cost and more efficient provider than other regions and I expect that to continue. We customers we already paid for that advantage. Regional rate variances are normal elsewhere. THXS Chris Butler [REDACTED]
