I don't understand after the very recent rate hike that was approved and with posting quarterly record profits and an ever-increasing stock price how this government can consider this request seriously. This request will hurt all Ontarians and only serve to enrich a few already wealthy individuals/corporations. At some point this government has to do something that actually benefits it's citizens and not just pander to major corporations. This is natural gas, something we use to heat our homes in the winter. Some people will actually not be able to heat their homes because of these requests if approved. I really implore the government of Ontario to deny this request and for once give a break to the average Ontarian instead of corporations.
