I am a 21 year old living on my own in one of the most expensive cities in North America. Before this increase my bills from enbridge range from 50-150 dollars - a price I can barely afford when coupled with ever increasing housing prices. Splitting the rate increases by zone still means that the all people living in those zones will be affected irrespective of their financial situation. I ask that enbridge make it so individuals or families have the option to opt out based on financial situations.
