Attn: Nancy Marconi

Regarding: Final Rate Order (EB-2022-0239)

Dear Registrar,

Cooperative Hydro Embrun Inc. received the Final Rate Order issued on December 1, 2022, regarding an application for electricity distribution rates and other charges beginning January 1, 2023.

In its findings, the OEB stated that it made several minor corrections to the wording and formatting of the Proposed Tariff of Rates and Charges previously filed by the utility. The OEB approved the revised version filed as an Appendix to the Rate Order. Tariff and Bill Impact Model filed by Cooperative Hydro Embrun uses an outdated rate of 21.2% instead of the current rate of 11.7%. Consequently, the OEB updated the OER rate and returned the model to the utility for review.

CHEI confirms the accuracy of the Tariff and Bill Impact Model as modified by the OEB and has filed it on record via RESS.

Yours very truly,

Benoit Lamarche, General Manager
