Subject: EB20220200 - Enbridge - Gas Rate

Hello,

I would like to express my dissatisfaction and concern about the rate increases for Enbridge Gas. The gas rates have already doubled from what they used to be a few months ago from \$16.8392 cents/m³ to \$32.6349 cents/m³. On average this is costing \$60-\$70 extra a month. This is a huge increase and costing home owners a lot of money each month especially when we are in the midst of recession. Many people in Ontario have lost their jobs due to COVID and restructuring and now coping with high grocery bills and other everyday necessities. On top of the existing increase, Enbridge Gas has sent in another application to further increase the rates. I feel this is outrageous and something must be done to lower the energy rates for all Ontarians, not increase them further. I have spoken with several people in my friend circle and they feel the same.

I spoke to Enbridge customer service and I was advised that double of the rates is set by Ontario Energy Board.
