Re: amendment of EG-2002-0367

Sirs,

I am writing to request a formal extension of Sky Generation's Electricity Generation License to cover a proposed new facility. Below is the information that I believe you require in order to facilitate that:

Location of new facility: Lots 56, 57, and 58, Lakeshore Road East, and lot 58 Lambton Shores West, Municipality of Lambton Shores.

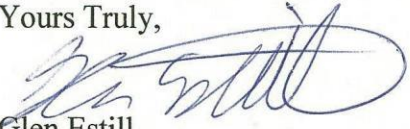

Size of facility: 8.25 MW, consisting of 5 1.65 MW Vestas V82 wind turbines.

Intended services and markets: Sky Generation intends to settle with the LDC, not the IESO, under the terms of the standard offer or IESO spot market settlement mechanisms. Sky Generation has entered into a connection agreement with Hydro One. Sky Generation does not intend to sell electricity to a consumer. The connection is to Hydro One's 27.6 KV feeder at Ipperwash Road, adjacent to Lot 59 Lakeshore Road West.

Municipal and Provincial approvals are in place, including zoning, official plan amendment, Environmental Screening Report, Certificate of Compliance for Sound.

Please confirm extension of the license to the new site at your earliest convenience.

Yours Truly,

  
Glen Estill  
President
