"The Incentive Rate-setting Mechanism consists of a formula which is tied to inflation and other factors intended to promote efficiency and is used to set rates for the years 2025 to 2028."

Will the rates for "natural gas distribution, transportation and storage" be reduced if there is a recession or the costs of "natural gas distribution, transportation and storage" be reduced due to better efficiency by Enbridge Gas Inc.?

Is there currently, or will there be, a portion of the application that will address the eventuality of a recession or reduced costs to Enbridge Gas Inc.?
