I don't think an increase in price right now is very fair to the regular, working-class people that rely on this utility. Our wages are not increasing with inflation. Constant price hikes on necessities, like food & utilities is making it very hard to live in Canada. Given that gas is a basic necessity for many, I would hope the government steps in to make sure it stays affordable for those of us who need it. I would love to switch to solar electric or a renewable source of some kind instead, but it's too much to afford when I can't even save a dime these days. Please do not approve a price increase. Whether or not it's fair to the company trying to keep pace with inflation, it is not fair to the customers who can't, and who have no alternatives.
