Focus on decreasing, not increasing costs to the consumer.

People and families are grappling with a 6.9% inflation rate, increasing interest rates, rental housing rates has increased over 15% making costs especially challenging for young adults and growing families.

Food bank use is over 10 percent; the largest single-year increase since 2009 and more and more employed people are using food banks.

We have been dealing with record-breaking vehicle gasoline prices.

Yet Enbridge is seeking permission yet again to increase our rates?

You just approved raising their rates last month and now Enbridge is asking to raise them again?!

Just stop.

Too many people are struggling, including middle income families that do not qualify for your LEAP program.

Too many people are running out of money before the month is out.
Meanwhile, Enbridge's CEO receives over \$17 Million in compensation.

Do not approve increases.
