As a concerned residential user, this application includes multiple requests to harmonize and standardize rates that will reflect an increase and negative impact for families during an incredibly challenging time as it relates to affordability and cost of living. Residential users have already been subject to significant increases in natural gases charges over the last 12 months. I would ask OEB to carefully review this request and consider the impacts to end users. Furthermore, full information is not available and users have not been clearly informed on the specific impact this would have on their rates.

The communication and notice received do not provide clear, accessible language and information for the majority of residential users to understand.
