Allowing essentially a monopoly (EG/Union Gas) be permitted to raise rates (ie costs) for a 4 yr period (2024 - 2028) is so far beyond reasonable and some would argue inhumane:

- heat and water are human essentials.
- many households have challenges paying current bills, let alone further increases.
- inflation is at all time highs perpetuated by continual cost increases of companies/businesses such as this.
- EG is making YoY profits despite the current challenging economic environment.
- there is very little to no other options (ie no competition) for most households to choose from.

Consider recent Loblaw's recent announcement / business practice .

Freezing prices on essential items / services. NOT permission to increase for 4 years.

Be a leader for the people.
