I have four questions I would ask that the review committee consider as part of their decision to accept or reject this proposed rate hike by Enbridge.

1) What has been the profit margin of this company over, say, the past five years? I suspect it has been excessive. We are all taking a hit in the global market place now and for the foreseeable future. Enbridge can no doubt afford to carry their share of this larger burden.

2) Why pass rising infrastructure costs along yet again to private residences and commercial enterprises in this economic climate? (see answer to question #1)

3) The Ontario Government, and I would include your body as part of that institution, should be actively encouraging energy companies like Enbridge to pursue sustainable, green energies and move away from fossil fuels. Why support the infrastructure of a dying industry?

4) And finally, have you followed the news about the climate emergency?

Please, for the sake of your children and mine, get in sync with current events. The world is heating up and you have the opportunity--the responsibility--to make a decision that helps or harms. Don't make it easy for fossil fuel companies to continue destroying our ecosystem.

Thank you for taking the time to read my letter and for pondering my questions.
