Any company who "ties" their rates to inflation leaves ALL their customers at a disadvantage. We, as customers DO NOT have a wage scale (indexed) or tied to inflation! Inflation has been low for years and now that it has risen(or rising) Enbridge is attempting to assure their profits will rise as inflation increases. Please say NO to Enbridge about "tieing" rates to inflation.

Most wage increases for YEARS have been around 2% so most of Enbridges' customer's have taken a 5% or more decrease in purchasing power.

Do some math, X(Enbridges' residential customer's) TIMES \$28/year. How many MILLIONS do you have?
