This email is in response to an email received from Enbridge Gas this date dealing for a proposed rate adjustment effective January 2023. Thousands of Ontario residents who are under contract with Enbridge will have received the same email and will be confused by it. The bottom line concern however is that most will assume, this email deals and will result with yet another increase in cost. Please be advised, our rate increased this year, August going forward, by 70%...I contacted the company to inquire if a mistake was made with this notice of increase. This is an outrageous increase and if we are reading this email correctly, it would appear another increase is on the way? I sincerely hope I am wrong...we are seniors trying to cope with inflation, carbon tax, price increase everywhere... Past or previous government policies allowed our electricity go through the roof and now Provincial government having to help subsidize cost..Our rates should not be any more expensive than what Quebec is charging...If this email does indeed represents a request for rate increase after having been faced with 70% increase already this summer, you can rest assured that we STRONGLY object to any approval to this increase...Board members and stock holders have to realize, we cannot take this anymore...
