Our rates took an alarming increase last fall going from \$98 per month on equal billing to \$136. As a family we have not seen a wage increase since inflation ballooned over the last year and we are noticing the impact of increased costs for basic necessities such as groceries. This additional impact would directly affect our family. I can only imagine how much greater the impact would be on families below or near the poverty line who will now have to choose between food, and heat. The government needs to step up and stop this monopoly from taking even more from people because we have no choice to turn to reduced costs.
