Our rates have continually increased. My greatest concern is that the increase in cost of natural gas also affects the costs associated with the service. If the services remained constant and apart from the cost of natural gas, then it would not have significant impact. However, when the cost of natural gas in-turn affects other costs; i.e. based upon a percentage of the cost of natural gas, the ENTIRETY of expenses must be considered and the impact expressed as a comprehensive and complete increase.
