I am writing to object Enbridge's rate increase request. Ever since they had aquired Union gas, they have been increasing their rates. Now, they are looking to do it again at a time when life is becoming unaffordable due to the federal government policies with their ridiculous carbon taxes and war on the energy sector. I almost fell off my chair when I received my Enbridge gas bill this month. I couldn't believe how high it was. We haven't even started to experience the cold weather yet. The Ontario Energy Board should not approve Enbridge's rate increase request. Infact, they should reduce the rates as they have literally doubled. It's easy for companies to pass on the additional costs of doing business onto consumers. For the last 2.5 years, the country has been through a rough time with this pandemic with people loosing their livelihoods, business closures, etc....Now we are dealing with the highest inflation in 40 years, again I blame federal government policies.

The high cost of living is destroying peoples capacity to make ends meet. I am begging that you do not approve Enbridge's rate increase request, as well to reduce the current rate. I do not want to be in the position where I have to decide between eating or heating my home, because like many Canadians, I cannot afford to have both. Show some compassion.
