The OEB may not allow Enbridge to charge more for natural gas but Enbridge makes up for that loss to their profits by increasing “other charges” on our bills. Example: last bill \$190. \$106 of those charges were for “other” items ??? We used only \$84 of that \$190 bill to heat our home.

Have lived in our home for 12+ years and have never paid above \$140 in any month. So what’s happening here to the consumers? This has to be reigned in. People have to chose between food and heating their homes. Enbridge is forcing that choice on Families. There has to be better oversight and control on Enbridge.
