ONTARIO ENERGY BOARD

RE: Enbridge Gas Distribution's Savings by Design DSM Program for 2016-2020

Dear Ms. Walli,

I am writing to encourage the Ontario Energy Board to continue its support of the Enbridge's Savings by Design program.

As a builder that has participated in the program, we at Yorkwood Homes have found it to be extremely helpful. It provided us with the opportunity to explore a number of viable design and technology alternatives as part of an effort to improve the energy and environmental performance of our project. Without the support of the program we would not likely have had the access to well qualified subject matter experts representing a range of diverse topics. The real-time energy modeling clearly demonstrated what the potential energy improvements can be while the access to information regarding broader sustainability issues have given us a solid foundation of ideas to consider for future projects.

We believe that the Enbridge Savings by Design program is contributing to the building industry's transformation to higher levels of energy and environmental performance and is assisting the building community in continuous improvement to meet pending building code changes.

We strongly support the continuation of this innovative approach to multi-disciplinary integrated design.

Sincerely,

Norman Godfrey
