Dear Ms. Marconi,

**Re: Independent Electricity System Operator
Correction to Evidence for 2023, 2024 and 2025 Fees, Expenditure and Revenue
Requirement Submissions
Ontario Energy Board File No.: EB-2022-0318**

The Independent Electricity System Operator (IESO) is filing revised evidence to correct the allocation of line losses between domestic and export customers used in the calculation of usage fees for 2023 to 2025. The following exhibits have been revised:

- Exhibit A-1-2 2023 Submission
- Exhibit A-1-3 2024 Submission
- Exhibit A-1-4 2025 Submission
- Exhibit A-1-5 Executive Summary
- Exhibit C-2-1 2023-2025 Revenue Requirements and Usage Fees

The revisions to the above exhibits are needed to address the following two corrections:

- The total demand (not including losses) listed in Tables 2 through 4 of Exhibit C-2-1 was decreased to include line losses. The resulting change is immaterial and results in no change in the line losses allocated to domestic and export customers.
- In calculating the IESO usage fees, 100% of projected line losses were erroneously allocated to domestic customers, which does not reflect the allocation of line losses between domestic and export customers set out in Tables 2 through 4 in Exhibit C-2-1. This error has been corrected and the recalculated IESO usage fees are set out in the revised evidence.

The revisions to each exhibit noted above have been blacklined for reference.

Yours truly,

Beverly Nollert
Senior Manager, Regulatory Affairs
