TO: All Parties in EB-2022-0200

**RE: Enbridge Gas Inc. (Enbridge Gas)
2024 Rebasing Application
Ontario Energy Board File Number: EB-2022-0200**

In a letter dated May 23, 2023, the Ontario Energy Board (OEB) set its expectations regarding any potential settlement proposal that may be presented to the OEB for its consideration. The letter made reference to certain parts of Issue 3 from the Issues List, but did not specifically mention the text of the Issue 3 relating to the date on which rates are expected to commence (i.e. January 1, 2024) and the consideration of relevant government policies and legislation.

Enbridge Gas filed a letter on May 24, 2023, asking the OEB to “confirm that the full context of Issue 3 is applicable” to its direction from the May 23 letter. Issue 3 in the Issues List reads as follows:

- 3) Has Enbridge Gas appropriately considered energy transition and integrated resource planning in relation to such things as:
 - a) load forecast
 - b) deemed capital structure
 - c) depreciation rates
 - d) forecast capital expenditures
 - e) allocation and mitigation of riskto determine new rates that will be effective January 1, 2024, considering relevant government policies and legislation?

The OEB confirms that the Issues List for this proceeding has not been amended, and that any proposed settled issues should have reference to the Issues List.

Yours truly,

Nancy Marconi
