ATTN: Kirsten Walli, Board Secretary

Monday, July 4, 2016

Dear Ontario Energy Board members,

As a member in the Legislative Assembly of Ontario, I support the generic proceeding EB-2016-0004, under which Enbridge Gas Distribution has made a submission which includes 39 potential expansion projects and a request for changes they deem necessary to make these and future such projects necessary.

Enbridge is committed to working with the Province toward a lower carbon future. Expanding natural gas to some communities that don't have natural gas is an excellent initiative for many residents as it significantly lowers their costs and promotes economic development in rural areas.

Natural gas is a relatively clean fuel and less costly for heating homes and businesses than other fuels.

I hear regularly from residents in my community who are seeking access to natural gas and I support efforts being made to bring this fuel to serviced communities.

Sincerely,

Grant Crack
MPP Glengarry-Prescott-Russell
