**EDA INTERROGATORY 7**

2 Issue 3.1 Is the IESO’s proposal for a proposed Operating Reserve of \$15 million in the  
3 Forecast Variance Deferral Account (FVDA) appropriate?

4 Issue 3.2 Is the IESO’s proposal to clear the amount of the 2022 year-end balance in the  
5 FVDA that exceeds the \$15 million Operating Reserve appropriate?

6 Issue 3.3 Is the IESO’s proposal for seeking OEB approval to adjust its previously approved  
7 expenditures, revenue requirement and fees in the event of a material unforeseen change  
8 appropriate?

9 [3.0-EDA-7](#)

10 **INTERROGATORY**

11 **Reference:** ExA-T1-S5 / Exhibit F-T1-S1

12 **Preamble:** The IESO is requesting an increase of \$5 million to retain an operating reserve  
13 of \$15 million over the three-year planning and approval period. This proposed increase  
14 recognizes the potential for additional unplanned events that may be material in scope and  
15 cost, given the scope and complexity of IESO’s mandate, and the expected transformation of  
16 the sector over the 2023- 2025 Business Plan. As the IESO looks forward to the 2023-2025  
17 planning period, the IESO believes that a \$15 million FVDA balance will be a reasonable and  
18 adequate reserve against the uncertainties and impacts referred to above (See Exhibit F-1-1  
19 – Forecast Variance Deferral Account).

20

21 Questions:

22 a) Proposal for Adjustment Due to Material Unforeseen Change: Please provide an analysis  
23 including volumes projected and realized to assess the risk of material unforeseen  
24 revenue change exceeding the operating reserve. Please explain the variances between

1 historically forecasted revenues collected, and the actual revenues collected from  
 2 domestic and export customers.

<u>Revenue Side Risk Calculation</u>		Actual	Actual	Actual	Actual	Budget	Budget	Budget
Revenues		2019	2020	2021	2022	2023	2024	2025
Forecasted:	Domestic TWh							
	Domestic \$							
Forecasted:	Export TWh							
	Export \$							
Total Revenue Requirement	IESO Usage Fee:							
Revenues		Actual	Actual	Actual	Actual	Budget	Budget	Budget
		2019	2020	2021	2022	2023	2024	2025
Actual:	Domestic TWh							
	Domestic \$							
Actual:	Export TWh							
	Export \$							
Total Revenue Requirement	IESO Usage Fee:							
Variance		Actual	Actual	Actual	Actual	Budget	Budget	Budget
		2019	2020	2021	2022	2023	2024	2025
Variance	Domestic TWh							
	Domestic \$							
Variance	Export TWh							
	Export \$							
Total Revenue Requirement	IESO Usage Fee:

3

4

5 b) **Proposal for Adjustment Due to Material Unforeseen Change:** Please provide an  
 6 analysis of material unforeseen expense change exceeding the operating reserve. Please  
 7 explain the variances between historically forecasted requirement and total adjusted  
 8 expenses.

<u>Expense Side Risk Calculation</u>		Actual	Actual	Actual	Actual	Budget	Budget	Budget
		2019	2020	2021	2022	2023	2024	2025
Forecasted Revenue Requirement								
Total Adjusted Expenses								
Variance:								

9

10 c) Please explain the financial protocols that are in place to mitigate material unforeseen  
 11 variances from occurring on the expense side exceeding board approvals. What is the

1 IESO's internal materiality threshold for review?

2 d) **Surplus Threshold:** The IESO proposes if the balance of its operative reserve reaches  
3 above \$30 million during the interim year period after the conclusion of the OEB  
4 proceeding the IESO will refund the surplus over \$30 million within a month of the annual  
5 publication of its Annual report on March 31<sup>st</sup>. Please confirm that the IESO is proposing  
6 a \$30M threshold, two times its operating reserve, 15% of approved revenue  
7 requirement for the refund **or charge** to customers during the interim period between  
8 rate applications. Explain the rationale for a \$30M threshold which triggers the settlement  
9 of the FVDA.

10

11 **RESPONSE**

12 a) Please see Table 1 below for historically forecasted revenues compared to the actual  
13 revenues collected. The variances are driven primarily by overall changes in volumes  
14 associated with extreme weather patterns and economy performance (e.g., pandemic  
15 slow down). The risk of volumes variances would have an impact on revenues between  
16 1% to 3% +/- annually. Please see response to 2.0 OEB Staff Interrogatory 13 a) for  
17 demand and revenue variance between Forecast and Actual.

18

1 **Table 1 - Forecasted Revenues Compared to Actual**

<b>Revenue (\$ Millions)</b>	<b>2019</b>	<b>2020</b>	<b>2021</b>	<b>2022</b>
Budget	190.8	188.6	191.8	201.5
Actual	191.0	188.6	195.0	206.6
<b>Variance \$</b>	<b>0.2</b>	<b>-</b>	<b>3.2</b>	<b>5.0</b>
<b>Variance %</b>	<b>0.1%</b>	<b>0.0%</b>	<b>1.7%</b>	<b>2.5%</b>

- 2 b) Please refer to Exhibit D Tab 1 Schedule 1 Appendix 2-JA for historical forecasted OM&A  
 3 and Total Expenses requirements compared to Actual (2019 – 2025). The 2019-2022  
 4 historical variances to the approved budget on the OM&A expenses have been immaterial  
 5 (less than 1%), and up until 2021 they have been lower than the projected  
 6 requirements; however, in 2017 the IESO received a recommendation from the Auditor  
 7 General that required a \$12 million adjustment to the expenses in that year which far  
 8 exceeded the available funding from the approved revenue requirement and the  
 9 Operating Reserve of \$6 million, and created a deficit balance in the Operating Reserve  
 10 which was not replenished until 2022.
- 11 c) The IESO conducts a forecast for the year at reasonable intervals that is presented to the  
 12 Executive Leadership Team for approval before it is submitted to the IESO Board for  
 13 review and discussion. In this forecast process the IESO conducts reprioritization  
 14 discussions to ensure actions are taken to mitigate material unforeseen variances as  
 15 much as possible. The IESO’s internal materiality threshold for review is any variance +/-  
 16 2%.
- 17 d) Please see the response to 3.0 OEB Staff Interrogatory 18.

**EP INTERROGATORY 10**

3.0 Operating Reserve

3.0-EP-10

**INTERROGATORY**

**Reference:** Exhibit A-1-3, Page 2

**Preamble:** Approval to retain \$15 million as an operating reserve in the Forecast Variance Deferral Account (FVDA).

Questions:

- a) Please provide the opening and closing balances of the FDA for 2018-2022 and 2023 (estimate).
- b) please provide FDA dispositions:
  - i) Refunds to rate payers,
  - ii) Retention,
  - iii) Forward to next year,
  - iv) Interest earned in year.
  - v) Please reconcile to FDA opening and closing balances.

**RESPONSE**

- a) In 2018, the FVDA had an opening balance of \$6.0 million and closed at a \$4.7 million deficit. The balances for 2019-2022 are provided in Exhibit F-1-1. The IESO is unable to provide an FVDA estimate balance as of December 2023, since it is dependent on decision and order on the market rebate to be issued by the OEB.
- b) Please see Table 1 in Exhibit F-1-1. Please note interest earned exclusively on the operating reserve isn't available.

1 **OEB STAFF INTERROGATORY 16**

2 ISSUE 3: Operating Reserve  
3

4 3.0-OEB STAFF-16

5 **INTERROGATORY**

6 **Reference:**  
7

- 8 a. EB-2019-0002, Decision and Order, December 5, 2019, p. 13  
9 b. Exhibit F / Tab 1/ Schedule 1 / p. 1 & 2  
10  
11

12 **Preamble:**

13 In the OEB's 2019 decision on the IESO's 2019 revenue requirement submission (EB-2019-  
14 0002), the IESO received approval to retain an operating reserve of \$10 million.  
15

16 However, OEB staff notes that in the above-noted decision, the OEB stated its expectations that  
17 this operating reserve will not be reviewed again for five years unless there is a material change  
18 to the operations of the IESO.  
19

20 In the current application, the IESO is requesting to increase the FVDA balance to \$15 million  
21 effective January 1, 2023, to manage cost or revenue variances that may arise over the  
22 planning horizon with the approval of all three years of the 2023-2025 Business Plan. This  
23 proposed increase recognizes the potential for additional unplanned events that may be  
24 material in scope and cost, given the scope and complexity of IESO's mandate and the  
25 expected transformation of the sector over the 2023-2025 Business Plan.  
26

27 In the scenario where costs exceed the current level of the operating reserve, the IESO stated  
28 that it must fund these costs by either reducing invested funds or increasing borrowings  
29 because the IESO is a not-for-profit, non-taxable corporation. The IESO stated that these  
30 actions have net interest impacts that increase costs.  
31

32 The IESO also noted that these expenditures would need to be restored in the next Business  
33 Plan and revenue requirement submission, and would therefore have a future impact on the  
34 IESO's revenue requirement and usage fees. The IESO believes that a \$15 million FVDA balance  
35 will be a reasonable and adequate reserve against the uncertainties and impacts referred to  
36 above within the 2023-2025 planning horizon.  
37

23  
24

- a) Given the OEB’s expectations in its decision for the IESO’s 2019 revenue requirement that the operating reserve of \$10 million was not to be reviewed again for five years unless there was “a material change to the operations of the IESO”, please explain why the IESO is of the view that a change to a \$15 million reserve should be made effective for its January 1, 2023 revenue requirement.
- b) Please describe whether there was “a material change to the operations of the IESO, as outlined in the OEB’s 2019 revenue requirement decision as a pre-requisite to changing the IESO’s operating reserve level.
- c) Please list any material changes to the operations of the IESO that the IESO is anticipating may happen from 2023 to 2025.
- d) If there was not an anticipated material change to the operations of the IESO, please provide reasons as to why the OEB should deviate from its findings in the 2019 revenue requirement decision (i.e., not to revisit the operating reserve for five years).
- e) Please list any OEB precedents for such an increase in operating reserve, including the EB# and date.

25 **RESPONSE**

26  
27  
28  
29  
30  
31  
32  
33  
34  
35

- a) The five-year period identified in the OEB’s decision in EB-2019-0002 will expire on December 31, 2023. While the review of the operating reserve is occurring a year earlier than was expected in EB-2019-0002, the IESO's preference is to have a uniform operating reserve for all three years covered by this application and to address the dispensation of any surplus or deficits at the time of the next application. The IESO’s rationale for increasing the operating reserve to \$15 million for the 2023-2025 period is discussed in Exhibit F, Tab 1, Schedule 1.
- b) Please see a) above. The IESO does not agree that “a material change to the operations of the IESO” should be treated as a pre-requisite to reviewing the IESO’s operating reserve in the context of a three-year application.

- 1 c) The IESO does not anticipate any material changes in its operations in the 2023 to 2025  
2 period that would require a further review of the operating reserve for those years.
- 3 d) Please see a) above.
- 4 e) In the OEB's Decision on the IESO's 2019 Revenue Requirement Submission (EB-2019-  
5 0002), dated December 5, 2019, the IESO's operating reserve was increased from \$6  
6 million to its current \$10 million level. In the IESO's 2015 Revenue Requirement  
7 Submission, as part of the Package Settlement on September 7, 2016, (EB-2015-0275),  
8 the IESO was approved by the OEB to retain an operating reserve of \$10 million, an  
9 increase of \$5 million from its previous \$5 million operating reserve.

1 **OEB STAFF INTERROGATORY 17**

2 ISSUE 3: Operating Reserve  
3

4 3.0-OEB STAFF-17

5 **INTERROGATORY**

6 **Reference:**  
7

- 8 a. Exhibit F / Tab 1 / Schedule 1 / p. 1-2  
9 b. Exhibit C / Tab 2 / Schedule 1 / p. 2  
10 c. Exhibit B / Tab 1 / Schedule 2 / p.23-26 (Appendix 2 of the 2023-2025 Business Plan)  
11  
12

13 **Preamble:**

14 In Exhibit F-1-1, the IESO outlines its request for an increase in its operating reserve,  
15 recognizing the potential for additional unplanned events that may be material in scope and  
16 cost. In Exhibit C-2-1, the IESO identifies some risks associated with forecast uncertainty:  
17 exchange rate, interest rates, change in demand, etcetera. The IESO further provides strategic  
18 and operational risks to achieving the IESO's strategic objectives with Appendix 2 of the 2023-  
19 2025 Business Plan: the undersupply of energy, maintaining credibility with the stakeholder  
20 community, cybersecurity risks, impairments to the IESO's efficiency mandate, and readiness to  
21 address transformation.  
22

23 **Questions:**  
24

- 25 a) Please articulate how the operating reserve could or would be used to mitigate the  
26 impact of each of the risks identified in references b. and c. should they materialize  
27 over the 2023-2025 period.  
28  
29 b) Please explain how the quantum of additional operating reserve, i.e. an increase of  
30 \$5 million or 50%, was derived based on the identified risks. Including, if available,  
31 the relative or absolute contribution of each of the above risks to determining the  
32 quantum.  
33  
34 c) Is the IESO concerned about any risks that are not identified in the filed evidence? If  
35 yes, what is the nature of the risk(s) and what are the potential impact(s)? How

1 would the operating reserve that the IESO carries in the FVDA be used to mitigate to  
2 impact of these risk(s) if they materialize?

3  
4 d) How would the IESO manage the increase in risk if the request to increase operating  
5 reserve was denied?  
6

7 **RESPONSE**

8 a) The operating reserve would be used to offset unplanned shortfalls in revenues and/or  
9 unforeseen expenses over the 2023-2025 period. With the operating reserve, the IESO  
10 is able to avoid borrowing to manage the unplanned and unforeseen variances, as well  
11 as the accrued interest from the borrowed amounts. The IESO is of the view that the  
12 requested \$15 million operating reserve is a reasonable amount to fund operations in the  
13 event of unplanned shortfalls in revenues or unforeseen expenses.

14 b) In determining the appropriate level of operating reserve, the IESO is guided by a  
15 balance of considerations, including the potential for unplanned variances to accumulate  
16 over a three-year period and exceed the reserve level, the opportunity to create  
17 regulatory efficiency over a three-year period by limiting the need to return before the  
18 OEB for revised fees in only exceptional circumstances, the historical use of the operating  
19 reserve, and ratepayer impact. The \$15 million operating reserve represents 2% of the  
20 IESO's total revenue requirements for 2023-2025.

21 c) The IESO's operating reserve is meant to offset revenue and/or expense variances,  
22 irrespective of their cause, so long as they are unplanned and unforeseen. See also the  
23 response to b) above.

24 d) The IESO would have to fund these unplanned and unforeseen variances by borrowing  
25 from its credit facility.  
26

1 **OEB STAFF INTERROGATORY 18**

2 ISSUE 3: Operating Reserve  
3

4 3.0-OEB STAFF-18

5 **INTERROGATORY**

6 **Reference:**

7

8 a. Exhibit F / Tab 1/ Schedule 1 / p. 4 & 6  
9

10 **Preamble:**

11 The IESO proposes that if the balance of its operating reserve reaches above \$30 million during  
12 the interim year period after the conclusion of the OEB proceeding, the IESO will refund this  
13 surplus over \$30 million within a month of the publication of its Annual Report on March 31st.  
14

15 However, the IESO also stated that it expects to carry surplus or deficits for the three-year  
16 period (2023 to 2025 revenue requirements) for dispensation at the next application.  
17

18 **Questions:**

19

20 a) Please explain whether the IESO made a typographical error and meant a surplus of  
21 \$15 million instead of \$30 million as described in the preamble to this interrogatory.  
22

23 b) If this was not a typographical error, please explain why the IESO is proposing a \$30  
24 million surplus in only this one instance, as opposed to a \$15 million surplus  
25 discussed in the remainder of the current application.  
26

27 c) Please explain why the IESO has referred to disposing the balance in the FDVA both  
28 on an annual basis and in its next revenue requirement application (i.e., expected  
29 for its 2026 revenue requirement). Please clarify the IESO's proposal regarding the  
30 timing of the disposition of the balance in the FVDA.  
31

32 d) Please explain whether the IESO would be supportive of an annual rebate to market  
33 participants within a month of the publication of its Annual Report on March 31<sup>st</sup>. A  
34 proposed rebate would occur in the event that the FVDA balance exceeds the OEB-  
35 approved operating reserve threshold for this account in any interim year (i.e., any  
36 year before its next application expected for the IESO's 2026 revenue requirement).

1  
2 e) If the IESO executes an annual rebate to market participants within a month of the  
3 publication of its Annual Report on March 31<sup>st</sup> (i.e., before its next application  
4 expected for its 2026 revenue requirement), please explain what type of approval  
5 process the IESO would seek from the OEB.

6  
7 f) Please provide the FVDA actual balance as at May 31, 2023 and the forecasted  
8 balance as at December 31, 2023.

9  
10 g) Please explain the drivers of any material FVDA actual balance as at May 31, 2023  
11 and the forecasted balance as at December 31, 2023.  
12

13 **RESPONSE**

14  
15 a) The IESO did not make a typographical error. However, the IESO clarifies that the \$30  
16 million surplus is the threshold at which the IESO would file a rebate with the OEB for the  
17 amounts exceeding \$15 million.

18 b) The IESO is proposing to carry surplus or deficits in the FVDA for the three-year period  
19 (2023 to 2025 revenue requirements) for dispensation at the next application. This  
20 approach takes advantage of the regulatory efficiencies offered by a three-year filing  
21 period by (i) avoiding the need for an annual cycle of regulatory filings by the IESO, and  
22 (ii) providing the IESO with the ability to manage the potential for offsetting annual  
23 revenue surpluses and deficits over a three-year period. At the time of the next  
24 application, the IESO would seek to refund any balance in the FVDA beyond the  
25 requested \$15 million operating reserve threshold. The IESO is also proposing that if the  
26 surplus in the FVDA exceeds \$30 million during the interim period, then the IESO will  
27 refund the amount of the surplus exceeding \$15 million within a month of the publication  
28 of its Annual Report on March 31<sup>st</sup>.

29 c) Please see b) above. The IESO is only proposing to dispose of its FVDA surplus on an  
30 annual basis if it reaches over \$30 million. If surplus does not reach \$30 million, then the  
31 IESO would dispose of any surplus in the subsequent application.

- 1 d) The IESO would not support an annual rebate. As discussed in b) above, the IESO's  
2 proposed approach takes advantage of the regulatory efficiencies offered by a three-year  
3 filing period. An annual rebate mechanism would not offer these advantages.
- 4 e) The IESO is seeking OEB approval of the rebate mechanism as part of this proceeding.  
5 The IESO does not expect that any OEB approval would be needed at the time of the  
6 rebate if the mechanism is triggered.
- 7 f) The interim balance of the FVDA as of March 31, 2023, is \$32.5 million prior to any  
8 potential market participant rebate ordered by the OEB. Note that the balance has been  
9 provided as of March 31, 2023 and not May 31, 2023 as requested as quarter- end  
10 processes for accruals are ongoing. The FVDA balance as of December 31, 2023 is  
11 forecasted to be \$16.7 million without any rebate to market participants.
- 12 g) The variance between March 31<sup>st</sup> interim FVDA balance (\$32.5 million) and the  
13 December 31<sup>st</sup> forecast (\$16.7 million) of \$15.8 million, is primarily driven by the present  
14 value of benefit enhancements included in the collective agreement that was settled in  
15 Q1 2023, in addition to actions taken to mitigate elevated attrition rates experienced at  
16 the IESO as a result of rising salaries in the market. See also response to f) above  
17 regarding the March 31<sup>st</sup> balance date.

1 **OEB STAFF INTERROGATORY 19**

2 ISSUE 3: Operating Reserve  
3

4 3.0-OEB STAFF-19

5 **INTERROGATORY**

6 **Reference:**  
7

- 8 a. Exhibit F / Tab 1/ Schedule 1 / p. 3  
9 b. Exhibit A / Tab 1/ Schedule 2 / p. 2  
10 c. EB-2020-0230, Response to OEB Staff Interrogatory #11, September 9, 2021  
11 d. Exhibit B / Tab 2 / Schedule 1 / p. 33 & 35 (2022 Annual Report)  
12

13 **Preamble:**

14 The IESO proposes that the increase to a \$15 million operating reserve be funded by \$5 million  
15 of the \$13.7 million surplus and the remaining \$8.7 million be refunded to market participants.  
16

17 A credit of \$8.7 million is shown in Exhibit F "Table 1: 2019 -2025 Balances and Transactions in  
18 the FVDA" in the column "2022 Actual".  
19

20 The IESO stated that it will rebate the surplus to market participants proportionate to the fees  
21 collected in 2022. The rebates will be provided in the next billing cycle following the month in  
22 which OEB approval is received.  
23

24 As noted in the response to an interrogatory in the IESO's 2020 and 2021 revenue requirements  
25 proceeding, the IESO rebated \$9.6 million and \$12.6 million to market participants in 2015 and  
26 2016, respectively.  
27

28 In its 2022 audited financial statements, Note 6, the IESO has shown an accumulated surplus of  
29 \$10 million as at December 31, 2022 for its Regulatory Deferral Account. However, in its current  
30 application, the IESO has shown a surplus of \$23.7 million in the FVDA as at December 31,  
31 2022.  
32

33 In its 2022 audited financial statements, Note 7, the IESO stated that in 2022 it recognized  
34 \$13.7 million in rebates due to market participants regarding system fees.

Questions:

- a) Regarding the FVDA, please explain why the IESO’s 2022 audited financial statements show a surplus of \$10 million as at December 31, 2022, but the current application shows a surplus of \$23.7 million.
- b) Please explain why it is appropriate to use the prior-period operating surplus from 2022 to fund the requested increase in operating reserve.
- c) Please explain why a credit of \$8.7 million is shown in Exhibit F “Table 1: 2019 -2025 Balances and Transactions in the FVDA” in the column “2022 Actual”, instead of the column “2023 Budget”, as it appears that this amount has not yet been refunded to market participants.
- d) Please describe the rate design in the current application of refunding the \$8.7 million surplus (in excess of a \$15 million operating reserve) to market participants, as OEB staff is not clear whether this will be refunded in 2023 or has already been refunded in 2022.
- e) Please describe the rate design in the current application of instead refunding the \$13.7 million surplus (in excess of a \$10 million operating reserve) to market participants, instead of a \$8.7 million surplus (in excess of a \$15 million operating reserve).
- f) Please describe the rate design that the IESO plans to use for the interim rate period, in the event of a surplus or deficit.
- g) Please explain why an accrual to rebate market participants of \$13.7 million was made as at December 31, 2022 in the IESO’s audited financial statements (and not yet rebated), but in the current application the IESO suggested to only rebate market participants \$8.7 million.
- h) Please explain how the IESO rebated its market participants \$9.6 million and \$12.6 million in 2015 and 2016 respectively. Please also explain whether the IESO proposes to use the same methodology to refund either \$8.7 million or \$13.7 million, as noted in the current proceeding.

**RESPONSE**

- a) In accordance with Public Sector Accounting Standards (PSAS), the IESO was required in its 2022 audited financial statements to accrue the potential rebate of the FVDA surplus to rate payers based on the current operating reserve level of \$10 million approved by the OEB.
- b) Using surplus to fund the operating reserve is easy to implement and has minimal impact on rate payers.
- c) The \$8.7 million credit represents the surplus in excess of the proposed \$15 million operating reserve threshold. The credit is applied to the period when it was incurred and not when it is paid.
- d) The \$8.7 million surplus will be rebated to rate payers in the next available market settlement process following the issuance of an OEB decision and order in this proceeding. The rebate would be applied as a one-time adjustment using the mechanism discussed in h) below and would not impact the IESO’s usage fees.
- e) As described in d) above, the IESO’s usage fees will not be impacted by the rebate to rate payers regardless of the amount of the rebate.
- f) For treatment of surpluses, please see d) and e) above in addition to the response provided in 3.0 OEB Staff Interrogatory 18 b). Regarding the treatment of deficits, please see the response provided in 3.0 OEB Staff Interrogatory 22 c).
- g) In accordance to the applicable accounting principles, the IESO made an accrual of \$13.7 million as at December 31, 2022 in its audited financial statements based upon the current operating reserve threshold approved by the OEB. In the current application, the IESO proposed to refund \$8.7 million surplus to allow the IESO to increase the operating reserve from \$10 million to \$15 million.
- h) In 2015 and 2016, the rebate was pro-rated to the rate payers that paid the administration fees (charge type 9990 “IESO Administration Charge” and charge type 754 “OPA Administrative Charge”) in the respective years. The same mechanism will be

1 used for any rebate paid after the issuance of an OEB decision and order in this  
2 proceeding.

1 **OEB STAFF INTERROGATORY 20**

2 ISSUE 3: Operating Reserve  
3

4 3.0-OEB STAFF-20

5 **INTERROGATORY**

6 **Reference:**  
7

- 8 a. Exhibit F / Tab 1/ Schedule 1 / p. 4  
9 b. Exhibit B / Tab 2 / Schedule 1 / p. 35 (2022 Annual Report)

10  
11 **Preamble:**

12 The IESO's proposal to increase the operating reserve to \$15 million is expected to decrease  
13 the risk of unforeseen expenses or revenues exceeding the operating reserve. However, if  
14 unforeseen expenses or change in revenues cause the IESO's proposed operating reserve, and  
15 the balance of the FVDA, to reduce below zero in Year 1 of the three-year cycle (i.e., in 2023),  
16 the IESO proposes that the IESO may choose to re-apply to adjust its fees. The IESO proposed  
17 that any material unforeseen expenses in Year 2 or Year 3 would likely be reviewed in the next  
18 application.

19  
20 If the \$15 million threshold is exceeded, the IESO would review whether it is appropriate and  
21 feasible to apply for revised usage fees with the OEB.  
22

23 The IESO's review would take into account items such as the availability of the IESO's letter of  
24 credit with the Ontario Electricity Financial Corporation (OEFC). The IESO currently has a \$160  
25 million unsecured credit facility agreement with the OEFC, with a \$nil amount drawn down as at  
26 December 31, 2022.  
27

28 OEB staff is seeking clarity on whether it is reasonable for the IESO to adjust its usage fees if  
29 the balance in the FDVA is a surplus greater than the OEB-approved operating reserve amount.  
30 This clarity is being sought given that the IESO is also proposing a different mechanism in the  
31 Application to refund such surpluses (i.e., rebates to market participants, rather than adjusting  
32 usage fees.  
33

34

35

1

2 Questions:

3

4 a) Please explain the different refund mechanisms that are being proposed (i.e., revise  
5 usage fees or issue rebates to market participants) in the event of a surplus in the  
6 context of the following:

7

8 i. Different amounts may actually be returned to customers based on the refund  
9 mechanism approved by the OEB

10 ii. Different timing of the two potential refund mechanisms

11 iii. Due to the differing timing, intergenerational equity issues may be incurred (i.e.,  
12 different customers may benefit depending on the refund mechanism approved  
13 by the OEB)

14

15 b) Regarding the OEFC credit facility, please explain whether the IESO is in essence  
16 proposing that it be granted discretion to access an additional \$160 million without OEB  
17 scrutiny on the reasonableness of that spend, if it deems necessary. This is because any  
18 over-spending of expenses would flow into the FVDA balance to be requested for  
19 clearance in a future application.

20

21

22 **RESPONSE**

23 a) i., ii., iii. The IESO is not proposing to revise its usage fees if there is a surplus in the  
24 FVDA. Please see the responses to OEB Staff Interrogatory 18 b), and 19 d) and h) for  
25 further details about the mechanism that the IESO would utilize to rebate surpluses to  
26 market participants.

27 b) The credit facility is not in addition to business plan revenue requirements submitted  
28 within the approved three-year business plan and currently under OEB review. The  
29 credit facility is an agreement to access money for temporary shortages in liquidity  
30 (cashflow). This is expected as actual spending does not necessarily align with business  
31 plan recovery i.e. recovery of the IESO fee to meet revenue requirements happens once  
32 a month, but capital and operational costs happen throughout a month.

1 **OEB STAFF INTERROGATORY 21**

2 ISSUE 3: Operating Reserve  
3

4 3.0-OEB STAFF-21

5 **INTERROGATORY**

6 **Reference:**

7

8 a. Exhibit F / Tab 1/ Schedule 1 / p. 4  
9

10 **Preamble:**

11 The IESO defines the material change threshold as follows:

- 12 • A change in revenue or expenses that results in an operating reserve deficit  
13 • Occurs in Year 1 after receiving three-year approval of IESO usage fees  
14 • A change that has a significant impact on the operation of the IESO  
15

16 Questions:

17

18 a) Please explain whether the material change threshold is intended to address both  
19 operating reserve deficits and surpluses.

20

21 b) If the material change threshold is not intended to also address surpluses, please  
22 explain.

23

24 c) Please define what is meant by the word "significant" in terms of the IESO's reference to  
25 a "significant impact on the operation of the IESO."  
26  
27

28 **RESPONSE**

29 a) The material change threshold is intended to address operating reserve deficits.

30 b) The material change threshold is not intended to address surpluses. The threshold is

31 focused on material changes that could result in costs or revenue deficits that would

32 affect the IESO's ability to continue operations and carry out its mandate. See responses

- 1 to 3.0 OEB Staff Interrogatories 18 b), 19 d) and h) and 20a) for the proposed  
2 treatment of surpluses.
- 3 c) A significant impact on the operation of the IESO in the context of the material change  
4 threshold means that the IESO can no longer work within its revenue requirements to  
5 carry out its business plan. For example, an unplanned event occurs in the first year and  
6 has a cascading impact that also compromises the IESO's ability to work within future  
7 years' revenue requirement and carry out the activities in its business plan.

1 **OEB STAFF INTERROGATORY 22**

2 ISSUE 3: Operating Reserve  
3

4 3.0-OEB STAFF-22

5 **INTERROGATORY**

6 **Reference:**

7

8 a. Exhibit F / Tab 1/ Schedule 1 / p. 5 & 6  
9

10 **Preamble:**

11 The IESO stated that if the material change threshold is reached, and the IESO decides the best  
12 course of action is to revise its usage fees, then the IESO would file a revised Business Plan  
13 with the Minister of Energy (The Minister) and following the Minister’s approval of the revised  
14 Business Plan, file a revised revenue requirement submission to the OEB for revised usage fees.  
15

16 The IESO would request approval of revised usage fees necessary to recover some or all of the  
17 IESO’s \$15 million operating reserve as appropriate at the judgment of the IESO based on  
18 business needs, economic factors, and impact on market participants.  
19

20 The IESO has listed the benefits of its adjustment proposal, but has been silent on the cons and  
21 risks.  
22

23 **Questions:**

24

25 a) In the absence of a material change, please explain whether the IESO plans to annually  
26 update its business plan in the interim period and seek the Minister’s approval on the  
27 revised business plan.  
28

29 b) Please explain how any revised business plan in the interim period would impact 2024  
30 Budget and 2025 Budget and if the IESO plans to revise such revenue requirement  
31 requests, even in the absence of a material change.  
32

33 c) Please describe the reasonableness of the IESO’s proposal to revisit usage fees in the  
34 event of either a deficit or surplus in the interim period (i.e., 2023 to 2025), before the  
35 filing of its next application expected for its 2026 revenue requirement.  
36

- 1 d) Please confirm that if the IESO applies to revise its usage fees in the interim period, in  
2 the event of either a deficit or surplus, it would be seeking OEB approval to also adjust  
3 its previously approved expenditures and revenue requirement(s). If this is not the case,  
4 please explain why the IESO’s proposal is asymmetric.  
5  
6 e) If the IESO’s usage fees are proposed to be revised in the event of a FVDA deficit or  
7 surplus, please explain why a revised revenue requirement submission would be  
8 required in the interim period (i.e., 2023 to 2025), rather than the IESO waiting to be  
9 made whole at the filing of its next application expected for its 2026 revenue  
10 requirement.  
11  
12 f) Please explain why the revised usage fees would be required to recover “some or all of  
13 the IESO’s \$15 million operating reserve”, as opposed to bringing the IESO to a break-  
14 even level.  
15  
16 g) Please describe the cons and risks of the IESO’s adjustment proposal.  
17  
18

19 **RESPONSE**

- 20 a) The IESO does not plan to annually revise its business plan and seek Minister approval  
21 during the interim years after OEB approval.  
22  
23 b) Please see the response to a) above.  
24  
25 c) The IESO is of the view that it is reasonable to revisit usage fees if there is a material  
26 change to its revenue or expenses that exceeds the \$15 million operating reserve, on a  
27 combined basis, within the first year after receiving OEB approval, with revised rates  
28 being effective in the third year of the application. This is not applicable in the second  
29 and third year of the application because there is insufficient time to revise and  
30 implement rates in advance of the next revenue requirement submission. As per the  
31 responses to 3.0 OEB Staff Interrogatories 18 b), 19 d) and h) and 20a), the IESO does  
32 not propose to revise usage fees in the event of a surplus.  
33  
34 d) The IESO is not proposing to adjust its usage fees in the event of a surplus. If the  
35 material change threshold for a deficit is met, and the IESO decides to file a revised  
36 business plan with the Minister, followed by a revised application with the OEB, it would

- 1 request approval for revised expenditures, revenue requirement and usage fees for the  
2 previously approved third year of its filing.
- 3 e) Refer to the response for d). The IESO understands that any such application to the OEB  
4 for revised expenditures, revenue requirement and usage fees would need to explain  
5 why the IESO could not wait to be made whole at the filing of its next application.
- 6 f) The IESO designed the proposal with the flexibility to recover some or all of the reserve  
7 to reduce any negative impacts based on business needs, economic factors and the  
8 impact on market participants. Whether the IESO would seek to recover amounts above  
9 a "break-even" level would be determined at the time of any such application.
- 10 g) The IESO believes its adjustment proposal is reasonable as it balances regulatory  
11 efficiency associated with a multi-year process with the prudence of interim review  
12 should material change thresholds be met.

1 **OEB STAFF INTERROGATORY 23**

2 ISSUE 3: Operating Reserve  
3

4 3.0-OEB STAFF-23

5 **INTERROGATORY**

6 **Reference:**  
7

- 8 a. Exhibit F / Tab 1/ Schedule 1 / p. 5  
9 b. Filing Requirements For Electricity Distribution Rate Applications - 2022 Edition for 2023  
10 Rate Applications - Chapter 3 Incentive Rate-Setting Applications May 24, 2022, p. 21 & 22  
11 c. Report of the Board on 3rd Generation Incentive Regulation for Ontario's Electricity  
12 Distributors, July 14, 2008  
13  
14

15 **Preamble:**

16 For the revised revenue requirement submission, the IESO proposes a limited scope of review  
17 focused on the unforeseen expense and its direct impact on the IESO's budget in order to  
18 maintain the regulatory efficiency of a multi-year approach. A limited scope of review would be  
19 requested to achieve the approval of revised usage fees prior to January 1st of Year 3.  
20

21 The IESO would specify the costs that impacted the IESO's operating reserve in detail and  
22 demonstrate that these impacts could not be accommodated within the approved IESO budget.  
23

24 OEB staff notes that the IESO's limited scope of the review focused on the unforeseen expense  
25 is similar to a Z-factor request.  
26

27 In the OEB's filing requirements for electricity distribution rate applications, distributors may  
28 request to recover costs associated with unforeseen events that are outside the control of a  
29 distributor's ability to manage. This is referred to as a claim for a "Z-factor" event. The cost to a  
30 distributor must be material and its causation clear.  
31

32 To recover these amounts, a distributor must follow the guidelines discussed in the OEB's  
33 Report on 3rd Generation Incentive Regulation for Ontario's Electricity Distributors. The  
34 materiality thresholds, described in the above noted OEB report, must be met on an individual  
35 event basis for the distributor to apply for recovery of the relevant costs.  
36

1 **To be eligible for a Z-factor claim, a distributor must demonstrate that its**  
2 **achieved regulatory return on equity (ROE), during its most recently completed**  
3 **fiscal year, does not exceed 300 basis points above its deemed ROE embedded in**  
4 **its base rates.**

5 Questions:

6

7 a) Given that the IESO does not have a ROE built into its rate structure, please explain how  
8 the IESO would satisfy the OEB's requirements for a Z-factor. Specifically what would  
9 the IESO propose to satisfy the OEB's requirement that its achieved ROE, during its  
10 most recently completed fiscal year, does not exceed 300 basis points above its deemed  
11 ROE embedded in its base rates?

12

13 For example, if the IESO incurs any profit at all in any given year from 2023 and forward  
14 (i.e., a profit incurred before its true-up to break-even with the offset recorded in the  
15 FVDA), would the IESO be agreeable to zero recovery of its "unforeseen expense"?

16

17 b) Rather than using the IESO's proposed approach for unforeseen amounts, please  
18 explain whether the IESO would be amenable to applying for a Z-factor claim under the  
19 OEB's filing requirements for electricity distributors (including the requirements set out  
20 in the Report of the Board on 3rd Generation Incentive Regulation for Ontario's  
21 Electricity Distributors). This would include satisfying such requirements rather than  
22 filing a revised revenue requirement submission.

23

24 **RESPONSE**

25 a) The IESO is not proposing to satisfy the Z-factor requirements applicable to electricity  
26 distributors and does not view it as an appropriate tool for managing deficits that meet  
27 the material threshold. The IESO is a not-for-profit statutory corporation with objects  
28 that include important electricity system matters such as planning, reliability and security.  
29 As a non-profit corporation, the IESO has no ROE (or any comparable metric) and its  
30 investments and activities cannot necessarily be evaluated on the basis of financial and  
31 economic measures that might apply in respect of regulated utilities. The IESO's  
32 proposed revenue requirement and capital expenditure envelope are included in the  
33 Business Plan that is approved by the Minister before the IESO files its submission for  
34 review with the OEB, which is distinct from the process electricity distributors follow in  
35 their incentive regulation mechanisms.

- 1        b) See the response to a) above. Given the IESO's mandate and objects under legislation,
- 2            the IESO is not amenable to applying for claims under the OEB's filing requirements for
- 3            electricity distributors.

1 **SUP INTERROGATORY 6**

2 3.0 Operating Revenue

3 3.0-SUP-6

4 **INTERROGATORY**

5  
6 Preamble: In the OEB's Notice of Hearing and Procedural Order No.1 dated March 22, 2023  
7 in EB-2023-0098 it is stated:

8 *Ontario Power Generation Inc. (OPG) filed an application with the Ontario Energy Board*  
9 *(OEB) on March 1, 2023, under section 78.1 of the Ontario Energy Board Act, 1998 seeking*  
10 *approval to establish a variance account to record the nuclear revenue requirement impacts*  
11 *resulting from the Ontario Superior Court overturning the Protecting a Sustainable Public*  
12 *Sector for Future Generations Act, 2019 (Bill 124).*

13 *Effective November 8, 2019, Bill 124 set a 1% maximum for annual increases in both wages*  
14 *and total compensation for unionized and non-unionized employees in the Ontario public*  
15 *sector for a three-year period. Bill 124 also applied to employees at OPG. The bill was legally*  
16 *challenged by unions and other organizations. On November 29, 2022 the Ontario Superior*  
17 *Court overturned Bill 124 and declared it to be "void and of no effect."*

18 *OPG has proposed that a new variance account be approved to record the nuclear revenue*  
19 *requirement impact effective March 1, 2023 until the effective date of the OEB's next*  
20 *nuclear payment amounts order. The proposed variance account would record the*  
21 *difference between the forecast compensation costs included in OPG's last nuclear payment*  
22 *amounts order and the compensation costs for the nuclear facilities resulting from the*  
23 *overturning of Bill 124.*

24 *OPG has also requested that the OEB issue an interim order effective March 1, 2023,*  
25 *approving the establishment of the requested variance account on an interim basis. On March*  
26 *22, 2023, the OEB approved the establishment of the new variance account on an interim*  
27 *basis effective March 1, 2023.*

28 IESO was also subject to Bill 124 and is currently in the same situation as OPG

29 Questions:

30 Please clarify:

31 a) Why IESO has not included a request for a variance account similar to OPG's in  
32 this application?

33 b) Is it IESO's intent to capture any such resulting variance in its operating reserve?

34

1       **RESPONSE**

- 2       a) On November 29, 2022, Bill 124 was overturned by the Ontario Superior Court of Justice.  
3             The Ontario government filed an appeal in response, and Bill 124 will stay in effect until  
4             the outcome of the appeal is known. For these reasons, the IESO has not made any  
5             requests to the OEB regarding Bill 124.
- 6       b) The IESO will consider all options available, as appropriate, once the outcome of the  
7             appeal is known and the financial impact is determined, including an application to the  
8             OEB as necessary as per the adjustment mechanism described in in Exhibit F, Tab 1,  
9             Schedule 1.

**SUP INTERROGATORY 7**

3.0 Operating Revenue

3.0-SUP-7

**INTERROGATORY**

**Preamble:** In its EB-2023-0098 submission, OPG states the following on p9,10:

*The impact of overturning Bill 124 on OPG's forecast compensation costs for the nuclear facilities for the 2022-2026 period is expected to be in excess of OPG's accounting order materiality threshold of \$10M per year. While the exact impact cannot be determined until the outcome of current and future processes to establish the compensation provisions of collective agreements that were or would have been covered by a moderation period is known, it is very likely that wage increases will exceed 1% in certain years. In this regard, a directional approximation of the impact can be observed from a response to an interrogatory submitted in EB-2020-0290 (Ex. L-F4-03-PWU-023), which asked OPG to "quantify the impact on the test period revenue requirement had wage escalation been set at inflation beginning in 2021". In response, OPG stated:*

*OPG understands the question to refer to future collective agreements that will be subject to the Bill 124 moderation periods. If the wage escalation were to be set at an assumed inflation rate of 2% per year for April 1, 2021 to March 31, 2024 for the PWU and 2% per year for January 1, 2022 to December 31, 2024 for the Society, estimated revenue requirement impact would [be] an increase of approximately **\$33M in 2022, \$39M in 2023, \$42M in 2024, \$36M in 2025 and \$28M in 2026**, for impacts on wages and resulting impacts on pension costs. As in EB-2016-0152, Ex. L-6.6-13 PWU-015, these estimates were determined on the basis of compensation costs reflected in OM&A expenses and are inclusive of associated income tax impacts (calculated at 25% tax rate / (1- 25% tax rate)).*

Questions:

IESO is requested to estimate the impact on its compensation costs of Bill 124 being withdrawn in a manner similar to that applied by OPG in its response to the above referenced interrogatory response. Please breakdown the annual impact by non-represented, SUP and PWU staff for both regular and non-regular staff.

1

2 **RESPONSE**

3 a) To respect good faith bargaining outcomes as part of the ongoing arbitration  
4 with the Society on the reopening provision for wages for 2022, 2023 and 2024,  
5 the IESO will await the outcomes of the Ontario government's appeal of the  
6 Ontario Superior Court of Justice decision to overturn Bill 124 before quantifying  
7 the financial impact.

1 **VECC INTERROGATORY 12**

2 Issue 3.0 Operating Reserve

3 3.0-VECC-12

4 **INTERROGATORY**

5 **Reference:** Exhibit F, Tab 1, Schedule 1

6 **Preamble:** *"The IESO is requesting to increase the FVDA balance to \$15 million effective*  
7 *January 1, 2023, to manage cost or revenue variances that may arise over the*  
8 *planning horizon with the 21 approval of all three years of the 2023-2025 Business Plan."*

9 Questions:

- 10 a) Please explain how the amount of \$15 million was determined to be an appropriate  
11 amount to cushion against unplanned events.
- 12 b) Some capital projects, like the Backup Operating Centre, have large contingencies that  
13 are not reflected in the Business Plan (Exhibit E, Tab 2, Schedule 1, Attachment 6, page  
14 1). In light of this and given the longer horizon under the 3-year review proposal of this  
15 application why would a larger contingency not be a more prudent course of action?
- 16 c) How is interest earned on unutilized contingency amounts accounted for in the budgeting  
17 process of the IESO?

18

19 **RESPONSE**

- 20 a) Please see the response to 3.0 OEB Staff Interrogatory 17 b).
- 21 b) For contingency of capital projects, the IESO leverages credit facilities to fund the capital  
22 expenditures and recovers the interest and debt costs of capital expenditures through  
23 the IESO usage fee once the capital asset is in service and amortized. The IESO views  
24 the requested operating reserve level as appropriate based on a balance of

- 1           considerations. Please see the response to 3.0 OEB Staff Interrogatory 17 b).
- 2           c) Unutilized contingency amounts of capital projects do not have an impact on interest
- 3           since this does not represent cash items that would require financing or that would earn
- 4           interest.

1 **VECC INTERROGATORY 13**

2 Issue 3.0 Operating Reserve

3 3.0-VECC-13

4 **INTERROGATORY**

5 **Reference:** Exhibit F, Tab 1, Schedule 1

6 **Preamble:**

7 Questions:

- 8 a) What is the dollar variance from the proposed annual budget that would trigger the  
9 process for usage fee adjustment under the "Material Change Threshold" provisions  
10 described in Appendix F?

11

12 **RESPONSE**

- 13 a) Please refer to the response to 3.0 OEB Staff Interrogatory 22 c).

1

**CME INTERROGATORY 6**

2 Issue 3.1 Is the IESO's proposal to retain an Operating Reserve of \$15 million in the Forecast  
3 Variance Deferral Account (FVDA) appropriate?

4

5 3.0-CME-6

6 **INTERROGATORY**

7 **Reference:** Exhibit F, Tab 1, Schedule 1, p. 1.

8

9 **Preamble:**

10 At page 1, the IESO outlines its proposal to increase its operating reserve to \$15 million.

11 Questions:

12

13 a) Please indicate all of the instances where the IESO has run a deficit and was required  
14 to resort to use of the operating reserve in the previous 5 years.

15 b) To the extent that the IESO is required to expend funds over and above its  
16 revenue requirement and operational reserve, please outline its impact on the  
17 IESO and its ability to achieve its mandate.

18 c) Please confirm that any expenditure of the operating reserve or amounts in  
19 excess of the operating reserve would be collected in future higher usage fees.

20 d) Please advise on what analysis the IESO performed to determine that \$5 million  
21 additional in the operating reserve was a reasonable and appropriate figure to  
22 defray the risks it identified.

23

24 **RESPONSE**

25 a) The IESO last used its operating reserve in 2018 to offset an increase in pension and OPEB  
26 expenses because of a discount rate change recommended by the Auditor General. The  
27 restatement of the pension and OPEB expenses resulted in an additional \$13.4 million in  
28 expenses and an operating reserve deficit of \$4.7 million.

- 1       b) To the extent that the IESO is required to expend funds over and above its revenue  
2       requirement and approved operating reserve, the IESO would access debt to finance its  
3       operation to achieve its mandate within the expected timelines and address the  
4       transformation of the energy sector. The impact to the IESO of any expenditure of the  
5       operating reserve or amounts more than the operating reserve including interest on  
6       borrowed amounts is that the collection of these amounts would need to be addressed in  
7       a future Business Plan.
- 8       c) See the response to b) above.
- 9       d) See the response to 3.0 OEB Staff Interrogatory 17 b).

1

**SEC INTERROGATORY 21**

2 Issue 3.1 Is the IESO’s proposal to retain an Operating Reserve of \$15 million in the  
3 Forecast Variance Deferral Account (FVDA) appropriate?

4 3.0-SEC-21

5 **INTERROGATORY**

6 **Reference:** [F-1-1, p.6]

7 **Preamble:** The IESO states that: “The IESO proposes that if the balance of its operating  
8 reserve reaches above \$30 million during the interim year period after the conclusion of the  
9 OEB proceeding, the IESO will refund this surplus over \$30 million within a month of the  
10 publication of its Annual Report on March 31st.”:

11 Questions:

12 a) Please confirm that the IESO would not bring forward an application to the OEB for  
13 specific approval to refund the surplus in such a situation.

14 b) Please explain why the IESO would not agree to refund a balance over \$15 million over  
15 the interim period.

16

17 **RESPONSE**

18 a) and b) please see the response to 3.0 OEB Staff Interrogatory 18.

1 **AMPCO INTERROGATORY 19**

2 Issue 3.3 Is the IESO’s proposal for seeking OEB approval to adjust its previously approved  
3 expenditures, revenue requirement and fees in the event of a material unforeseen change  
4 appropriate?

5 3.0-AMPCO-19

6 **INTERROGATORY**

7 **Reference:** F-1-1 p.4

8 **Preamble:** The IESO defines the material change threshold as follows:

- 9 • A change in revenue or expenses that results in an operating reserve deficit  
10 • Occurs in Year 1 after receiving three-year approval of IESO usage fees  
11 • A change that has significant impact on the operation of the IESO

12

13 Questions:

14 a) Please discuss if the IESO is currently aware of any potential events that could result in  
15 the proposed operating reserve, and the balance of the FVDA, to reduce below zero in  
16 Year 1 of the three-year cycle.

17

18 **RESPONSE**

19 a) As noted in the response to 3.0 SUP Interrogatory 6, while the outcome of the appeal of  
20 Bill 124 is not yet known, nor the financial impact, the IESO will consider all options  
21 available, as appropriate, once the outcome of the appeal is known.
