Please do not invest in expanding natural gas infrastructure. Please invest in heat pumps, insulation, energy storage, and solar power. I'm very proud of how clean Ontario's grid is and would like it to remain that way so I can tell my grandchildren about it one day. But if you decide to ignore climate scientists and expand natural gas infrastructure, many people my age may choose not to have kids as we don't want them to live in a world where they can't go outside and play basketball due to air pollution.
