Subject: OEB File No. EB-2022-0111 Bobcaygeon Pipeline Project - Notice of Hearing

Dear Sir/Madam,

I am writing to express my concerns about Enbridge running a new pipeline in front of my house.

I do NOT want anything showing above ground on my property, including an inspection/monitoring station for showing information or testing on their pipeline.

I do not feel that this should be put on places with houses as there are many areas without houses where they can be located.

Also, I find the incompetence shown by Enbridge in getting our physical address wrong (they put down [REDACTED] instead of our address at [REDACTED], on the Notice of Hearing information) which was delivered by UPS appalling. Had my neighbour who received our information packages about what Enbridge is doing not given us the packages we would not have been informed until it was too late to respond to their Notice of Hearing and express our concerns.

I also do NOT appreciate being given less than two weeks time to respond to what they are going to do and to make an informed decision after doing my own research about their pipeline.

Thank you for taking the time to acknowledge my concerns on this matter.

Sincerely,

Ron Sydney
