Dear Sir or Madam:

I unanimously and fully contend, that the notice of application and electricity distribution rate change that Hydro One is asking for should be dismissed and definitely not granted, to proceed. Ever since, the taxpayer has been gouged, by the irresponsibility of Ontario One executives, on over spending and glutting the public monies into their one idiotic schemes, then why should they have the audacity by asking the Ontario Energy Board, to basically "UP" their rates, that they charge the consumer. Is London Hydro workers, still getting the public monies to pay for their U.I.C. premiums? This, is just one of the items, when I state, how the publics monies are being manipulated into ridiculous schemes. My hydro bill just keeps climbing and climbing, with no stoppage in escalation, in the near future. What happens when finally the people in this province, under this premier, that keeps breaking his promises of tax reduction, finally say that we, as the people in Ontario, will reduce our electrical consumption? That would then lead in Hydro crying and whining that they are losing revenue. Rate hikes, would then jump in; it is inevitable. No matter how much you or I reduce, corporations will always cry foul, even though we are doing our part.

This is why; I am totally against in granting Hydro One an electricity distribution rate change. It will never cease.

People of Ontario, cannot afford it and the amount of money, that people are spending on their hydro bills, where is it going?

To finalize, Board Secretary, I really believe that instead of asking for an increase, Hydro One should be giving ever Ontarian, which owns a house or business, money back for thanking the homeowner or the business for using hydro from Hydro One. Is that ridiculous? That is my point.

Thank you Board Secretary

Sincerely,

Chris Hall Family
