

**Via RESS**

17 August 2023

Ms. Nancy Marconi  
Registrar  
Ontario Energy Board  
2300 Yonge Street, 27th Floor  
Toronto, Ontario  
M4P 1E4

Dear Ms. Marconi,

**Re: Kingston Hydro Corporation \_Electricity Distribution License ED-  
2003-0057  
2024 IRM Application for Electricity Distribution Rates (EB-2023-0034)**

Kingston Hydro Corporation ("Kingston Hydro") is submitting its distribution rate application (EB-2020-0034) for electricity distribution rates ("EDR") effective January 1, 2024. Kingston Hydro is seeking a rate adjustment for 2023 rates based upon the process for Price Cap Incentive Rate-setting applications for the 2023 rate year.

Kingston Hydro anticipates that since this is an incentive rate ("IRM") application with only mechanistic adjustments contemplated, that the OEB's streamlined process for applications of this nature will be followed and that this application Filing will be decided by delegated authority without hearing.

The Filing includes the Application; the Manager's Summary and several live models, as detailed in the Application, and the OEB's IRM checklist.

This Filing includes proposed disposition of Group 1 account balances eligible for disposition. As per the analysis in the completed IRM rate generator deferral and variance tabs and the Global Adjustment Analysis work form, Kingston Hydro Corporation certifies it has robust processes and internal controls in place for the preparation, review, verification and oversight of the account balance being disposed, consistent with the certification requirements of the filing requirements.

Kingston Hydro Corporation confirms that the documents filed in support of this distribution rate application do not include any personal information (as that phrase is defined in the Freedom of Information and Protection of Privacy Act), that is not otherwise redacted in accordance with rule 9A of the OEB's Rules of Practice and Procedure.

The Filing and supporting materials are being filed through the Board's online RESS (Pivotal UX) filing system.

If further information is required, please contact Sherry Gibson, Manager, Rates and Regulatory Affairs at 613-546-1181, Extension 2383.

Yours truly,

A handwritten signature in black ink, appearing to read "Randy Murphy".

Randy Murphy  
Chief Financial Officer and Corporate Secretary

## 2024 IRM Rate Application

- 1) The Applicant is Kingston Hydro Corporation (the “Applicant”). The Applicant is a licensed electricity distributor operating pursuant to electricity distribution license ED-2003-0057. The Applicant distributes electricity to approximately 28,000 customers in the City of Kingston. All Kingston Hydro customers will be affected by this application.
- 2) For 2023 distribution rates adjustments, Kingston Hydro filed a Cost of Service (“COS”) rate application (EB-2022-0044).
- 3) In this application for 2024 rates, Kingston Hydro Corporation is applying for order or orders granting distribution rates updated and adjusted effective for January 1, 2024, in accordance with the process for Price Cap Incentive Rate-setting applications for the 2024 rate year. Specifically in this application, Kingston Hydro is applying for:
  - Base Rate Adjustment;
  - An adjustment to the Distribution Retail Transmission Service Rates;
  - Disposition of Group 1 Deferral and Variance Accounts;
  - The continuation of all other Specific Service Charges, Retail Service Charges and Loss Factors
- 4) This Application is supported by written evidence that may be amended from time to time, prior to the Board's final decision on this Application.
- 5) In the event that the Board is unable to provide a Decision and Order in this Application for implementation by the Applicant as of January 1, 2024, the Applicant requests that the Board issue an Interim Rate Order declaring the current Distribution Rates and Specific Service Charges as interim until the decided implementation date of the approved 2024 distribution rates.
- 6) In the event that the effective date does not coincide with the Board's decided implementation date for 2024 distribution rates and charges, the Applicant requests permission to recover the incremental revenue from the effective date to the implementation date.
- 7) The Applicant is of the expectation that since this is an IRM application, that the OEB's streamlined process for applications of this nature will be followed. And that based upon elements included and adjustments contemplated being largely mechanistic, the Applicant requests this Application be decided by delegated authority without hearing.

8) The primary day-to-day contact for this application should be:

**Sherry Gibson, Manager, Rates and Regulatory Affairs**

Tel: 613-546-1181 extension 2383

Fax: 613-546-1624

Email: [sgibson@utilitieskingston.com](mailto:sgibson@utilitieskingston.com)

9) The Applicant requests that a copy of all documents filed with the Board in this proceeding be served on the Applicant, as follows:

Kingston Hydro Corporation

1211 John Counter Boulevard

PO Box 790

Kingston ON K7L 4X7

Attention: **Randy Murphy, Chief Financial Officer**

## **Manager's Summary**

This Manager's Summary addresses the following:

1. Introduction and Summary
2. Base Rate Adjustment and 2024 Distribution Rates
3. Retail Transmission Services Rates Adjustments
4. Low Voltage Rates
5. Deferral and Variance Accounts
  - 5.1. Global Adjustment Workform
  - 5.2. Disposition Group 1 Accounts
6. Regulatory Charges
7. Other Rates and Charges
8. Summary of Proposed Rates Changes and Bill Impacts
9. Appendices
  - Appendix A – Current 2023 Tariff of Rates and Charges
  - Appendix B - Proposed 2024 Tariff of Rates and Charges
  - Appendix C – Bill Impacts

## **1. Introduction and Summary**

Kingston Hydro Corporation is seeking adjustments to its approved 2023 rates in accordance with the process for Price Cap Incentive Rate-setting applications for the 2024 rate year.

The application affects all customers.

The adjustments Kingston Hydro seeks in this application will result in a monthly increase of \$3.14 or 2.5% increase per month for a residential customer consuming 750 kWh. The increase does not factor in applicable taxes or the Ontario Electricity Rebate.

### **Certification of Evidence**

Per the filing requirements, an application filed with the OEB must include a certification by a senior officer of the applicant that the evidence filed is accurate, consistent, and complete to the best of his or her knowledge<sup>1</sup>. A Certification of Evidence by the Chief Financial Officer (CFO) is included in the cover letter of this Application.

### **Electronic Models**

In preparation of this Application, Kingston Hydro has utilized the OEB's 2024 IRM Rate Generator Model that calculates 2024 distribution rates, Retail Transmission Rates, and Group 1 rate riders, and as well produces the 2024 tariff schedule and bill impacts. Kingston Hydro has also completed the OEB's Global Adjustment analysis work form.

Kingston Hydro has included the following electronic models in Excel with this Filing:

- IRM Check list
- IRM Rate Generator
- Global Adjustment Work form;
- 2024 Tariff sheets.

---

<sup>1</sup> Filing Requirements For Electricity Distribution Rate Applications - 2023 Edition for 2024 Rate Applications - Chapter 3 Incentive Rate-Setting Applications, June 15, 2023.

## 2. Base Rate Adjustment and 2024 Distribution Rates

Kingston Hydro proposes to increase its base distribution rates, effective January 1, 2024, based on a mechanistic rate adjustment using the OEB-approved inflation minus X-factor formula applicable to Price Cap IR applications. Kingston is aware that recently the OEB commenced.

The components of the Price Cap IR adjustment formula applicable to Kingston Hydro are shown in Table 1 below.

**Table 1: Price Cap IR components**

Components		Amount
Inflation Factor		4.80%
X-Factor	Productivity	0.00%
	Stretch ((0.00% – 0.30%))	0.15%

The most recent stretch factor assigned to Kingston Hydro by the OEB is 0.15% (Cohort II). Kingston Hydro notes that it has increased efficiencies and improved to Cohort II for the 2024 IRM rate year.

Kingston notes that the Price Escalator (inflation factor) in the IRM model has been set at the 2024 OEB calculated value.

The proposed increase to Kingston Hydro's rates using the Price Cap IR adjustment formula is 4.65%:  $4.65\% = (4.80\% - (0.00\% + 0.15\%))$ .

Table 2 summarizes Kingston Hydro's current 2023 base rates and the proposed 2024 base rates calculated in the OEB's 2024 IRM Rate Generator Model using the mechanistic rate adjustment inflation minus X-factor formula.

Kingston Hydro transitioned to a fully fixed residential monthly distribution service charge for 2019 as per the OEB's residential rate design policy.

### Accuracy of Current Tariff in Rate Generator Model

In the OEB's 2024 IRM Rate Generator Model, Kingston's current 2023 Tariff rates are pre-populated. Kingston Hydro confirms the pre-populated Tariff reflects Kingston Hydro's 2023 OEB approved Tariff. However, Kingston notes that the OEB's Decision and Order on Wholesale Market Service rates and Rural or Remote Electricity Rate Protection charges (EB-2022-0269) issued December 8, 2022 and effective January 1, 2023 is not reflected in this Tab 2 Current Tariff Schedule.

**Table 2: 2024 Proposed Adjustments to Kingston Hydro's 2023 Base Rates**

The Rate Generator Model calculates the 2024 distribution base rates by applying the 4.65 per cent adjustment to the model pre-populated 2023 base rates. The following table shows current 2023 and proposed 2024 base rates.

MSC	Distribution Rates	Monthly Service Charge		
	Customer Class	Unit	Current 2023	Proposed 2024
	Residential	\$	\$28.69	\$30.02
	General Service Less Than 50 kV	\$	\$16.28	\$17.04
	General Service 50 to 4,999 kW	\$	\$123.27	\$129.00
	Large Use	\$	\$5,419.98	\$5,672.01
	Unmetered Scattered Load	\$ per customer	\$7.14	\$7.47
	Street Lighting	\$ per light	\$1.61	\$1.68
	* Standby Power	\$		
VR	Distribution Rates	Distribution Volumetric Rate		
	Customer Class	Unit	Current 2023	Proposed 2024
	Residential	\$ per kWh	0	0
	General Service Less Than 50 kV	\$ per kWh	0.0179	0.0187
	General Service 50 to 4,999 kW	\$ per kW	3.7604	3.9353
	Large Use	\$ per kW	1.6761	1.7540
	Unmetered Scattered Load	\$ per kWh	0.0141	0.0148
	Street Lighting	\$ per kW	18.3754	19.2299
	* Standby Power			

### 3. Electricity Distribution Retail Transmission Service Rates

Kingston Hydro's current 2023 Retail Transmission Service Rates (RTSRs) that it charges customers were last adjusted in its 2023 Cost of Service (COS) application (EB-2022-0044).

Kingston has partially embedded status within Hydro One Networks' distribution system, and as such, incurs transmission costs based on wholesale UTR rates and as well as transmission costs based on Hydro One Networks Inc. RTSR rates for its Sub-Transmission rate class.

In this application Kingston Hydro requests approval to adjust the RTSRs that it charges to customers to reflect the rates that it pays for transmission services based on the current UTRs and host-RTSRs.

Kingston Hydro has used the OEB's 2024 Rate Generator Model RTSR tabs to calculate the class specific RTSRs. Allocated costs to each of the rate classes for RTSR adjustments are based upon Kingston's most recent reported 2023 2.1.5 Performance Based Regulation RRR Billing determinants, non-loss adjusted.

## Accuracy of RTSR Model Billing Determinants

In the OEB's 2024 IRM Rate Generator Model, the billing determinants are pre-populated. Kingston Hydro confirms the pre-populated rate classification billing determinants reflect Kingston Hydro's RRR filings for 2023 report year (fiscal year 2022).

## UTRs and host-RTSRs Rates

The Rate Generator Model is populated with current 2023 UTRs and host-RTSRs. Kingston's RTSR rates were last adjusted using 2022 UTR and host-RTSR rates. In addition to forecast UTR/host-RTSR costs, the current RTSRs charged by Kingston to its customers and Kingston's 2022 reported RRR values used as billing determinants also figure into Kingston's proposed 2024 RTSRs to be charged to its customers. The current and proposed RTS rates are shown in Table 3.

**Table 3: 2023 Current and 2024 Proposed Retail Transmission Service Rates**

Rate Class	Unit	Current 2023 RTSR-Network	Proposed 2024 RTSR Network	Percent Change
Residential	kWh	\$ 0.0095	\$ 0.0095	0.0%
General Service Less Than 50 kW	kWh	\$ 0.0085	\$ 0.0085	0.0%
General Service 50 to 4,999 kW	kW	\$ 3.7445	\$ 3.7526	0.2%
Large Use	kW	\$ 4.5116	\$ 4.5213	0.2%
Unmetered Scattered Load	kWh	\$ 0.0095	\$ 0.0095	0.0%
Street Lighting	kW	\$ 2.7047	\$ 2.7105	0.2%
* Standby Power				
Rate Class	Unit	Current 2023 RTSR-Connection	Proposed 2024 RTSR Connection	Percent Change
Residential	kWh	\$ 0.0067	\$ 0.0074	10.4%
General Service Less Than 50 kW	kWh	\$ 0.0061	\$ 0.0067	9.8%
General Service 50 to 4,999 kW	kW	\$ 2.6461	\$ 2.9135	10.1%
Large Use	kW	\$ 3.1883	\$ 3.5104	10.1%
Unmetered Scattered Load	kWh	\$ 0.0067	\$ 0.0074	10.4%
Street Lighting	kW	\$ 1.9112	\$ 2.1043	10.1%
* Standby Power				

The proposed RTS rate adjustments result generally in a 0.2 per cent increase and a 10 per cent increase to RTSR network and connection charges across the rate classes respectively, with rounding errors accounting for the minor per cent change differences. The adjustments reflect the adjustments to historical transmission rates from 2022 to 2023 current and the adjustments to the historical sub-transmission rates from 2022 to 2023 current rates, and Kingston's 2023 reported RRR values used to calculate the proposed 2024 RTSR rates.

Further detail relating to the adjustments may be found in the completed IRM Rate Generator Model in the tabs relating to RTSRs.

#### 4. Low Voltage Service Rates

Per the current filing requirements<sup>2</sup>, the adjustment of low voltage service rates in an IRM rate application is optional.

Kingston Hydro last adjusted its low voltage rates in its 2023 Cost of Service rate application (EB-2022-0044), for rates effective January 1, 2023. The adjustment was based upon 2022 Hydro One sub-transmission rates and forecast 2023 test year volumes.

In this IRM rate application, Kingston Hydro is not proposing to adjust its current 2023 low voltage service rates. Kingston requests the continuation of current 2023 low voltage service rates.

**Table 4: 2023 Current and 2024 Proposed Low Voltage Service Rates (No Change)**

Rate Class	Unit	Current 2023 LV Service Rates	Proposed 2024 LV Service Rates (No Change)	Percent Change
Residential	kWh	\$ 0.0021	\$ 0.0021	0.0%
General Service Less Than 50 kW	kWh	\$ 0.0019	\$ 0.0019	0.0%
General Service 50 to 4,999 kW	kW	\$ 0.8058	\$ 0.8058	0.0%
Large Use	kW	\$ 0.9709	\$ 0.9709	0.0%
Unmetered Scattered Load	kWh	\$ 0.0021	\$ 0.0021	0.0%
Street Lighting	kW	\$ 0.5820	\$ 0.5820	0.0%
* Standby Power				

#### 5. Deferral and Variance Accounts

Kingston Hydro confirms that it has fully implemented the OEB's February 21, 2019 guidance effective from January 1, 2019.

No changes are proposed to previously OEB approved final basis balances.

Kingston notes the following about Group 1 and 2 Accounts:

##### Group 1 Accounts

- The variance in account 1588 of \$59,285 and 1589 of \$62,643 are due to current year-end unbilled to actual revenue differences.
- The variance in account 1568 of \$277,862 is due to the fact that Kingston Hydro is not applying for disposition of account 1568.

##### Group 2 Accounts

- Kingston Hydro is not disposing of any Group 2 accounts with this rate application. Group 2 accounts were last disposed of in Kingston Hydro's 2023 Cost of Service rate application (EB-2022-0044).

<sup>2</sup> Filing Requirements For Electricity Distribution Rate Applications - 2023 Edition for 2024 Rate Applications - Chapter 3 Incentive Rate-Setting Applications, June 15, 2023.

## 5.1 Global Adjustment Workform

The completed Global Adjustment (GA) Workform has been filed in Live Excel format.

Kingston notes the following:

- Kingston Hydro has reconciled the GA Workform to 1.0%.

## 5.2 Disposition of Group 1 Deferral and Variance Balances

In this Application Kingston Hydro proposes to dispose of Group 1 DVA account balances.

In Kingston Hydro's 2019 Custom IR Year 4 update rate proceeding decision<sup>3</sup>, Kingston's 2020 Custom IR Year 5 update proceeding decision<sup>4</sup>, and Kingston's 2021 IRM proceeding decision<sup>5</sup>, Kingston received approvals for interim disposition of Group 1 DVA balances. These were then disposed of on a final basis in Kingston's 2023 Cost of Service rate application (EB-2022-0044).

Kingston Hydro has used the OEB's 2024 IRM Rate Generator Model DVA related tabs to assist in calculating the class specific DVA rate riders. Pre-populated billing determinants reflect 2023 2.1.5 RRRs Kingston reported.

Kingston is proposing one year rate riders for disposition of the Group 1 deferral and variance account balances. The balances Kingston is proposing for disposition of are detailed in the completed IRM Rate Generator Model. Four separate rate riders are proposed as follows:

1. Rate Rider for Disposition of Deferral/Variance Accounts
2. Rate Rider for Disposition of Deferral/Variance Accounts Applicable only for Non-Wholesale Market Participants
3. Rate Rider for Disposition of Global Adjustment Account Applicable only for Non-RPP Customers
4. Rate Rider for Disposition of Capacity Based Recovery Account Applicable only for Class B Customers

---

<sup>3</sup> EB-2018-0047 Kingston Hydro Corporation 2020 Custom IR Year 4 Update

<sup>4</sup> EB-2019-0048 Kingston Hydro Corporation 2020 Custom IR Year 5 Update

<sup>5</sup> EB-2020-0034 Kingston Hydro Corporation 2021 IRM

### **Wholesale Market Participant (WMP) and Class A Customers**

Kingston Hydro notes that it has one Wholesale Market Participant (“WMP”) customer within the General Service 50 to 4,999 kW rate class.

Kingston Hydro has Class A customers in two rate classifications: Large Use and General Service 50 to 4,999kW.

The OEB’s 2024 IRM Rate Generator Model DVA tabs have been designed to establish separate rate riders to appropriately recover the balances in the RSVA from Wholesale Market Participants who must not be allocated the RSVA account balances related to charges for which the WMPs settle directly with the IESO (e.g. wholesale energy, wholesale market services). Kingston Hydro’s WMP has not been allocated a share portion of 1580, 1588, and 1589 RSVA account balances.

### **Global Adjustment Account Balance Disposition Allocation**

And in accordance with the Filing Requirements, since Kingston serves Class A customers per O.Reg 429/04, Kingston addresses in this Application the Class A allocation for recovery of global adjustment it considers appropriate based on settlement process with the IESO. The global adjustment account captures the difference between the amounts billed (or estimated to be billed) to non-RPP customers by the distributor and the actual amount paid by the distributor to the IESO.

Kingston’s entire Large Use rate class is Class A. Kingston Hydro’s settlement process with the IESO offsets to zero the Class A contribution to the 1589 Global Adjustment balance. Hence based on the settlement process with the IESO for Kingston Hydro Class A customers, it would be appropriate to not allocate for the recovery of the global adjustment variance balance for the Class A customers. Kingston Hydro is proposing not to charge a Rate Rider for the Disposition of Global Adjustment Account for its Class A customers.

Kingston Hydro serves an embedded WMP within its General Service 50 to 4,999 rate class. The WMP settles directly with the IESO the Global Adjustment charge. Therefore, Kingston Hydro’s proposed Rate Rider for the Disposition of Global Adjustment Account excludes the WMP customer.

## **6. Regulatory Charges**

Kingston’s current 2023 approved Tariff of Rates and Charges<sup>6</sup> includes several rates to be charged to customers to cover the costs associated with various programs and wholesale market services. The rates are each a component of the “Regulatory Charge” on a customer’s bill and

---

<sup>6</sup> EB-2022-0044 Kingston Hydro Corporation Cost of Service Decision and Rate Order issued November 22, 2022.

established by the OEB annually through a separate generic rate order. Regulatory rates to be charged include:

- Rural or Remote Electricity Rate Protection (RRRP) charge
- Wholesale market service (WMS),
- Capacity Based Recovery (CBR) charge for Class B customers

The current 2023 RRRP rate of \$0.0007 per kWh was set by the OEB on December 8, 2022<sup>7</sup>. The RRRP charge is a source of revenue for identified rural and remote electricity distributors to allow them to reduce the amount of revenue they would otherwise have to charge some of their customers to distribute electricity.

The current rates for WMS, billed to Class A and B customers, and for CBR, billed to Class B customers are \$0.0041 per kWh and \$0.0004 per kWh respectively<sup>8</sup>. Distributors bill Class A customers their share of the actual CBR charge based on their contribution to peak demand.

Wholesale market service (WMS) charges are designed for distributors to recover costs charged by the Independent Electricity System Operator (IESO) for the operation of the IESO-administered markets and the operation of the IESO-controlled grid, as well as the costs of the IESO's CBR initiative. Electricity distributors recover the WMS charges from customers through the WMS rate.

The current generic regulatory rates have been included in Kingston's proposed 2024 Tariff of Rates and Charges in Appendix B.

## **7. Other Rate and Charges**

### **a) Specific Service Charges, Retail Service Charges, Allowances, and Loss Factors**

Kingston Hydro requests the continuation of all other Specific Service Charges, Allowances, and Loss Factors, subject to OEB policy updates.

The proposed 2024 Tariff of Rates and Charges in Appendix C reflects the continuation of Kingston's 2023 Specific Service Charges, Retail Service Charges, Allowances and Loss Factors.

In accordance with OEB's Wireline Pole Attachment Charges Report<sup>9</sup>, generic wireline pole attachment charges for rate-regulated electricity distributors are to be adjusted by an annual inflation factor. Wireline pole attachment charges have been adjusted by the known

---

<sup>7</sup> EB-2022-0269, Decision and Order, December 8, 2022

<sup>8</sup> EB-2022-0269, Decision and Order, December 8, 2022

<sup>9</sup> Report of the OEB – "Wireline Pole Attachment Charges", EB-2015-0304, issued March 22, 2018.

2024 inflationary factor of 4.80 per cent by the IRM Generator Model and appear in the proposed 2024 Tariff of Rates and Charges.

Kingston's Tariff also includes energy retailer charges. Energy retailer service charges refer to the charges that recover the cost of services provided by electricity distributors to electricity retailers or to customers, related to the supply of competitive electricity.

In accordance with OEBs energy retailer service charges report<sup>10</sup>, generic retailer service charges for rate-regulated electricity distributors are to be adjusted by an annual inflation factor. Per the report the OEB will issue a generic order every December to adjust all miscellaneous service charges that are subject to an inflationary adjustment to be effective January 1st of each year. Energy retailer service charges have been adjusted by the known 2024 inflationary factor of 4.80 per cent by the IRM Generator Model and appear in the proposed 2024 Tariff of Rates and Charges.

**b) microFIT Generator Rate**

Each year, the OEB reviews the province-wide fixed monthly service charge related to the microFIT Generator Service Classification to ensure that it continues to reflect actual costs. It was last reviewed January 26, 2022. Kingston Hydro's 2023 approved Tariff of Rates and Charges includes this microFIT province-wide generator rate with a monthly service charge of \$4.55.

Kingston Hydro is applying for the continuation of this rate at the province-wide uniform fixed monthly service charge currently set at \$4.55. This rate and charge amount has been included in Kingston Hydro's proposed 2024 Tariff of Rates and Charges in Appendix B.

**c) Rate Rider for Smart Metering Entity Charge**

Kingston Hydro's 2023 approved Tariff of Rates and Charges includes a Rate Rider for Smart Metering Entity Charge (SMC) of \$0.42 per smart meter per month applicable to all Residential and General Service less than 50kW customers.

On September 8, 2022, the OEB approved the application by the Independent Electricity System Operator (IESO), in its capacity as the Smart Metering Entity (SME), for a smart metering charge (SMC) of \$0.42 per smart meter per month for the 2023-2027 period (EB-2022-0137).

The OEB also issued a letter to all licensed electricity distributors outlining that the SMC is a pass-through amount to be charged by distributors to all applicable customers in the Residential and General Service <50kW classes.

---

<sup>10</sup> Report of the OEB: "Energy Retailer Service Charges", EB-2015-0304, issued November 29, 2019.

The SMC of \$0.42 has been included on Kingston Hydro's proposed 2024 Tariff of Rates and Charges in Appendix B.

## 8. Summary of Proposed Rates Changes and Bill Impacts

A copy of Kingston's current 2023 Tariff of Rates and Charges is provided in Appendix A and Kingston's proposed 2024 Tariff of Rates and Charges is provided in Appendix B.

The effective date of the proposed rates changes is January 1, 2024.

Detailed bill impacts for all rate classes reflecting sample customer profiles are provided in the bill impacts tab of the IRM Rate Generator Model.

Table 5 shows the bill impacts of the rate adjustments relating delivery and total bill proposed in this Application for sample customer profiles in each rate class.

**Table 5: Total Bill Impact for Sample Customer Profiles**

RATE CLASSES / CATEGORIES (eg: Residential TOU, Residential Retailer)	Units	Customer Profile		Sub-Total								Total	
				A (excluding pass-through)		B Distribution (includes sub-total A)		C Delivery (includes sub-total B)				Total Bill	
		Consumption (kWh)	Demand kW (if applicable)	\$	%	\$	%	\$	%	\$	%	\$	%
RESIDENTIAL SERVICE CLASSIFICATION - RPP	kwh	750		\$ 1.33	4.6%	\$ 2.55	7.4%	\$ 3.10	6.6%	\$ 3.14	2.5%		
GENERAL SERVICE LESS THAN 50 kW SERVICE CLASSIFICATION - RPP	kwh	2,000		\$ 2.36	4.5%	\$ 5.96	8.9%	\$ 7.22	7.4%	\$ 7.31	2.4%		
GENERAL SERVICE 50 to 4 999 kW SERVICE CLASSIFICATION - Non-RPP (Other)	kwh	45,360	70	\$ 17.97	4.7%	\$ 95.96	28.6%	\$ 115.25	14.7%	\$ 130.23	1.9%		
LARGE USE SERVICE CLASSIFICATION - Non-RPP (Other)	kwh	3,450,000	5,500	\$ 680.48	4.6%	\$9,823.13	51.2%	\$11,648.03	18.9%	\$ 13,162.27	2.5%		
UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION - Non-RPP (Other)	kwh	750		\$ 0.86	4.8%	\$ 0.33	1.4%	\$ 0.88	2.4%	\$ 0.99	0.7%		
STANDBY POWER SERVICE CLASSIFICATION -				\$ -	0.0%	\$ -	0.0%	\$ -	0.0%	\$ -	0.0%		
STREET LIGHTING SERVICE CLASSIFICATION - Non-RPP (Other)	kwh	150,000	375	\$ 670.44	4.5%	\$1,133.86	7.7%	\$ 1,208.45	7.4%	\$ 1,365.55	3.4%		

The total bill impact of the rate changes and rate riders proposed in this IRM 2024 rate application, for a Kingston Hydro Residential customer (on TOU RPP electricity commodity rates) with a monthly electricity consumption of 750 kWh, is \$3.14 or 2.5% increase per month. The increase does not factor in applicable taxes or the Ontario Electricity Rebate.

The total bill impact of the rate adjustments and rate riders proposed in this IRM 2024 rate application, for a General Service Less Than 50 kW customer (on TOU RPP electricity commodity rates) with a monthly electricity consumption of 2,000 kWh, is \$7.31 or a 2.4% increase per month. This does not factor in applicable taxes or the Ontario Electricity Rebate.

Appendices included with this Application:

Appendix A – 2023 Current approved Tariff of Rates and Charges  
Appendix B – 2024 Proposed Tariff of Rates and Charges  
Appendix C – Bill Impacts

## TARIFF OF RATES AND CHARGES

### Effective and Implementation Date January 1, 2023

This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors

EB-2022-0044

## RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. All customers are single-phase. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any changes, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

## MONTHLY RATES AND CHARGES - Delivery Component

Service Charge	\$	28.69
Rate Rider for Disposition of Group 2 Deferral/Variance Accounts (2023) - effective until December 31, 2023	\$	0.58

## GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This classification refers to a non residential account taking electricity at 750 volts or less whose monthly average peak demand is less than, or is forecast to be less than, 50 kW. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any changes, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

## TARIFF OF RATES AND CHARGES

### Effective and Implementation Date January 1, 2023

This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors

EB-2022-0044

## GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification refers to a non residential account whose monthly average peak demand is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any changes, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

### MONTHLY RATES AND CHARGES - Delivery Component

## LARGE USE SERVICE CLASSIFICATION

This classification refers to an account whose monthly average peak demand is equal to or greater than, or is forecast to be equal to or greater than, 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any changes, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

## UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification refers to an account taking electricity at 750 volts or less whose monthly average peak demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The customer will provide detailed manufacturer information/documentation with regard to electrical demand/consumption of the proposed unmetered load. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any changes, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

### Effective and Implementation Date January 1, 2023

This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors

EB-2022-0044

## STANDBY POWER SERVICE CLASSIFICATION

This classification refers to an account that has Load Displacement Generation and requires Kingston Hydro Corporation to provide back-up service. Standby Charges are to be applied to behind-the-meter generators that are not IESO market participants, FIT program participants, net-metered generators or retail generators, which have their own metering and settlement conventions as per regulation and legislation. Further servicing details are available in the distributors's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any changes, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

## MONTHLY RATES AND CHARGES

Standby Charges are based on applicable monthly General Service < 50kW, General Service > 50kW to 4,999 kW or Large Use Distribution Volumetric Charges, depending on the rate classification of the generator host facility.

In the case where utility grade metering is not installed on the generator, Distribution Charges on the generator host facility's load account will be determined by multiplying the peak hourly delivered load as measured by the load account meter in kW by applicable variable charges for the rate class. Standby Charges are determined by multiplying the nameplate capacity of the behind the meter generator in KW by applicable Standby Power charges in each month.

This type of scenario is preferable for our customers if the generator is a "baseload" or "24-7-365" generator such as a fuel cell CHP unit or pressure-drop turbine unit. It may also be preferable to the customer where the cost of utility grade metering is high or the size of the generator is very small relative to the demand of the host load customer.

In the case where utility grade metering is installed on the generator, Distribution Charges on the generator host facility's load account will be determined by multiplying the peak hourly delivered load as measured by the load account meter in kW by applicable variable charges for the rate class. Standby Charges will be determined by multiplying the peak coincident combined kW delivered by both the distribution system and the generator, less the peak hourly delivered load in kW of the host customer facility as measured by the generator host load account meter.

This type of scenario is preferable for customers who wish to use generators or electricity storage facilities to participate in provincial conservation initiatives such as the IESO's Demand Response or Industrial Conservation Initiatives, or reduce kWh consumption, but are not able to operate their generators "24-7-365".

approved schedules of Rates, Charges and Loss Factors

EB-2022-0044

## STREET LIGHTING SERVICE CLASSIFICATION

This classification refers to an account for roadway lighting with a Municipality, Regional Municipality, Ministry of Transportation and private roadway lighting operation, controlled by photo cells. The consumption for these customers will be based on the calculated connected load times the required lighting times established in the approved Ontario Energy Board street lighting load shape template. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any changes, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

## TARIFF OF RATES AND CHARGES

### Effective and Implementation Date January 1, 2023

This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors

EB-2022-0044

## RETAIL SERVICE CHARGES (if applicable)

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity.

One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	\$	111.66
Monthly fixed charge, per retailer	\$	44.67
Monthly variable charge, per customer, per retailer	\$/cust.	1.11
Distributor-consolidated billing monthly charge, per customer, per retailer	\$/cust.	0.66
Retailer-consolidated billing monthly credit, per customer, per retailer	\$/cust.	(0.66)
Service Transaction Requests (STR)		
Request fee, per request, applied to the requesting party	\$	0.56
Processing fee, per request, applied to the requesting party	\$	1.11
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail Settlement Code directly to retailers and customers, if not delivered electronically through the Electronic Business Transaction (EBT) system, applied to the requesting party		
Up to twice a year	\$	no charge
More than twice a year, per request (plus incremental delivery costs)	\$	4.47
Notice of switch letter charge, per letter (unless the distributor has opted out of applying the charge as per the Ontario Energy Board's Decision and Order EB-2015-0304, issued on February 14, 2019)	\$	2.23

## LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle.

Total Loss Factor - Secondary Metered Customer < 5,000 kW	1.0469
Total Loss Factor - Secondary Metered Customer > 5,000 kW	1.0139
Total Loss Factor - Primary Metered Customer < 5,000 kW	1.0364
Total Loss Factor - Primary Metered Customer > 5,000 kW	1.0038

### 2024 Proposed Tariff of Rates and Charges

# Kingston Hydro Corporation

## TARIFF OF RATES AND CHARGES

### Effective and Implementation Date January 1, 2024

This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors

EB-2023-0034

## RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. All customers are single-phase. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any changes, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

## GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This classification refers to a non residential account taking electricity at 750 volts or less whose monthly average peak demand is less than, or is forecast to be less than, 50 kW. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any changes, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

### MONTHLY RATES AND CHARGES - Delivery Component

Service Charge	\$	17.04

## GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification refers to a non residential account whose monthly average peak demand is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any changes, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

## UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification refers to an account taking electricity at 750 volts or less whose monthly average peak demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The customer will provide detailed manufacturer information/documentation with regard to electrical demand/consumption of the proposed unmetered load. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any changes, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

### MONTHLY RATES AND CHARGES - Delivery Component

### Effective and Implementation Date January 1, 2024

This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors

EB-2023-0034

## STANDBY POWER SERVICE CLASSIFICATION

This classification refers to an account that has Load Displacement Generation and requires Kingston Hydro Corporation to provide back-up service. Standby Charges are to be applied to behind-the-meter generators that are not IESO market participants, FIT program participants, net-metered generators or retail generators, which have their own metering and settlement conventions as per regulation and legislation. Further servicing details are available in the distributors's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any changes, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

## MONTHLY RATES AND CHARGES

Standby Charges are based on applicable monthly General Service < 50kW, General Service > 50kW to 4,999 kW or Large Use Distribution Volumetric Charges, depending on the rate classification of the generator host facility.

In the case where utility grade metering is not installed on the generator, Distribution Charges on the generator host facility's load account will be determined by multiplying the peak hourly delivered load as measured by the load account meter in kW by applicable variable charges for the rate class. Standby Charges are determined by multiplying the nameplate capacity of the behind the meter generator in KW by applicable Standby Power charges in each month.

This type of scenario is preferable for our customers if the generator is a "baseload" or "24-7-365" generator such as a fuel cell CHP unit or pressure-drop turbine unit. It may also be preferable to the customer where the cost of utility grade metering is high or the size of the generator is very small relative to the demand of the host load customer.

In the case where utility grade metering is installed on the generator, Distribution Charges on the generator host facility's load account will be determined by multiplying the peak hourly delivered load as measured by the load account meter in kW by applicable variable charges for the rate class. Standby Charges will be determined by multiplying the peak coincident combined kW delivered by both the distribution system and the generator, less the peak hourly delivered load in kW of the host customer facility as measured by the generator host load account meter.

This type of scenario is preferable for customers who wish to use generators or electricity storage facilities to participate in provincial conservation initiatives such as the IESO's Demand Response or Industrial Conservation Initiatives, or reduce kWh consumption, but are not able to operate their generators "24-7-365".

## STREET LIGHTING SERVICE CLASSIFICATION

This classification refers to an account for roadway lighting with a Municipality, Regional Municipality, Ministry of Transportation and private roadway lighting operation, controlled by photo cells. The consumption for these customers will be based on the calculated connected load times the required lighting times established in the approved Ontario Energy Board street lighting load shape template. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any changes, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Reconnection charge - at pole - after regular hours	\$	415.00

**Other**

Specific charge for access to the power poles - per pole/year (with the exception of wireless attachments)	\$	37.78
Layout fees	\$	200.00

**RETAIL SERVICE CHARGES (if applicable)**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity.

One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	\$	117.02
Monthly fixed charge, per retailer	\$	46.81
Monthly variable charge, per customer, per retailer	\$/cust.	1.16
Distributor-consolidated billing monthly charge, per customer, per retailer	\$/cust.	0.69
Retailer-consolidated billing monthly credit, per customer, per retailer	\$/cust.	(0.69)
Service Transaction Requests (STR)		
Request fee, per request, applied to the requesting party	\$	0.59
Processing fee, per request, applied to the requesting party	\$	1.16
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail Settlement Code directly to retailers and customers, if not delivered electronically through the		

**Kingston Hydro Corporation**  
**TARIFF OF RATES AND CHARGES**  
**Effective and Implementation Date January 1, 2024**  
**This schedule supersedes and replaces all previously**  
**approved schedules of Rates, Charges and Loss Factors**

EB-2023-0034

Electronic Business Transaction (EBT) system, applied to the requesting party		
Up to twice a year	\$	no charge
More than twice a year, per request (plus incremental delivery costs)	\$	4.68
Notice of switch letter charge, per letter (unless the distributor has opted out of applying the charge as per the Ontario Energy Board's Decision and Order EB-2015-0304, issued on February 14, 2019)	\$	2.34

## LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle.

Total Loss Factor - Secondary Metered Customer < 5,000 kW	1.0469
Total Loss Factor - Secondary Metered Customer > 5,000 kW	1.0139
Total Loss Factor - Primary Metered Customer < 5,000 kW	1.0364
Total Loss Factor - Primary Metered Customer > 5,000 kW	1.0038

## Appendix C

---

### Bill Impacts

## Incentive Rate-setting Mechanism Rate Generator for 2024 Filers

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. **Those distributors that are still in the process of moving to fully fixed residential rates should refer to section 3.2.3 of Chapter 3 of the Filing Requirements for Incentive Rate-Setting Applications.**

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

Note:

1. For those classes that are not eligible for the RPP price, the weighted average price including Class B GA of **\$0.1076/kWh (IESO's Monthly Market Report for May 2023)** has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact table for the specific class.

2. Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1".

Distributors should provide the number of connections or devices reflective of a typical customer in each class.

Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.
