Toronto, Ontario, M4P 1E4

Dear Nancy Marconi:

**Re: Enbridge Gas Inc. (Enbridge Gas or the Company)
EB-2022-0200 – 2024 Rebasing – Phase 1 Undertaking Responses
Confidential Exhibit Including Irrelevant Information**

On August 18, 2023 Enbridge Gas filed its remaining undertaking responses in the above noted proceeding. Within this filing and in accordance with the OEB's *Practice Direction on Confidential Filings* Enbridge Gas provided a confidential response to Exhibit J14.9 Attachment 1, GDS Risk Register that contained both confidential and irrelevant information.

An unredacted version of the above noted response was provided to the OEB with confidential portions highlighted. A separate unredacted version that kept the irrelevant portion of the response redacted was also provided for parties who signed the OEB's Declaration and Undertaking.

The OEB rendered its Decision on Confidentiality on September 1, 2023. In this Decision the OEB agreed with Enbridge Gas that risk item #157 in Exhibit J14.9, Attachment 1 (set out in Attachment A to the Enbridge Gas letter) is irrelevant. The OEB also granted Enbridge Gas's request for confidential treatment of other requested items (set out in Attachment B to the Enbridge Gas letter).

The OEB ordered Enbridge Gas to file a revised confidential version of Exhibit J14.9, Attachment 1 with the above-described irrelevant information unredacted.

Enbridge Gas was very surprised to see the OEB's requirement to produce irrelevant information in a way that is the same as confidential filings, since that does not appear to conform with the process for addressing irrelevant information as set out in the Practice Direction on Confidential Filings (including Section 11). Nevertheless, Enbridge Gas is proceeding as directed to file the unredacted version of the document that can be accessed by authorized parties.
